## **The Global Human Right To Health Dream Or Possibility:**

**Removing the Barriers to Global Health Equity** Theodore H. MacDonald, Rashmin Tamnhe, 2018-04-24 Medical research and global awareness of health inequalities continue to grow apace Why then is global health inequality widening with benefits disproportionately affecting the richest third How can obstacles to more equitable healthcare be overcome This passionately argued book presents answers that will be essential reading for everyone interested in global health public health public policy and economics Policy makers in global communities and government political activists and all those with an interest in equality in healthcare will find stimulating well supported analyses of the interaction between neoliberal policies geopolitical issues and health Meanwhile professionals in international healthcare organisations care agencies and international charities will find challenging and refreshing socio political solutions to those offered by the current neoliberal paradigm

**Health, Human Rights and the United Nations** Theodore Macdonald, Diane Plamping, 2018-04-19 In the light of impending environmental catastrophe people all over the world in all walks of life are becoming more aware of the pressing need to act globally The need to base our decisions and actions less on parochial national advantage sequestered in hate and suspicion of other nation s playing the same game of Russian roulette have to give way to a new appreciation of the fact that our global village is indeed so very small and perilously frail We depend upon one another as never before and unless we insure the health and human rights of all we shall surely each perish individually In *Health Human Rights and the United Nations* Theodore H MacDonald carefully analyses the origin development and structure of the United Nations UN and its key agencies and considers its capacity to mediate the Universal Declaration of Human Rights He takes a detailed look into human rights abuses in Sudan s Darfur province Burma Liberia the Occupied Palestinian Territories and the United Kingdom By investigating the development of the World Health Organization WHO and the pressures being brought to bear upon it MacDonald exposes contradictions in the aims of both the WHO and the UN Does the current global political scene and its neoliberal policies nullify the work of both Is the UN fit for purpose Can drastic reforms result in equitable solutions Can a new trans national body be developed to arbitrate global trade health human rights and fiscal issues This remarkable book is ideal for anyone interested in international law human rights global health public health and health promotion Public health and health promotion professionals including international healthcare organisations care agencies and international charities will find the analysis enlightening It is also of great interest to policy makers and shapers in communities and government political activists and all those with an interest in equality and globalisation

**The Global Human Right to Health** Theodore Macdonald, Richard Mayon-White, 2018-04-19 This work includes forewords by Senator Noel A Kinsella and John A Gibson respectively Speaker Canadian Senate Barrister at Law and Principal International Refugee Consulting This is a book based on what the Charter of the UN states about health as a basic human right General readers will find a refreshing up to date account of why these issues are so crucial while professionals will find the cogent epidemiological analyses needed

to inform research efforts The book argues that the major causes of ill health are not bacteria and viruses or even war and natural disasters but poverty If we could solve the immensely complex problems of global inequities in wealth the health inequities would largely vanish The issue is not a simple one This book sets out among other things to break down the communication barriers between the professionals doctors economists and international bankers and the ordinary person who looks with dismay at international injustice but feels totally inadequate in the face of it The book argues that neoliberal approaches to global finance and international trade which are inextricably linked to the looming environmental crisis are not the only way open to us and suggests alternatives Above all it offers hope and a useful role for all of us in solving the problems Theodore H MacDonald s previous books have won international acclaim To this new title he brings to bear the fruits of years of experience as a medical doctor teacher and researcher in some of the poorest countries in the world This book is provocative and will inspire informed action on the part of all of us The passion conviction and wealth of knowledge of this work s author are evident His ability as a communicator in conjunction with a tempered expertise held by few enables him to identify analyze and provide his reflection on the right to health and its relation to global economics The content and style of the writing reflects MacDonald s impressive experiential background Theodore Macdonald is known internationally as a leader in the promotion of the human right to health Not only does this work have great heuristic value it also serves as an example of how the efforts of one remarkable individual can address the concerns of millions Noel A Kinsella in his Foreword Optimistic clear and concise The book greatly informs a lay reader like myself Arguments are invariably backed up by hard empirical data drawn from a range of authoritative sources This book significantly adds to the understanding of health as a fundamental human right the content of that right and what must be done to ensure that it can become a reality for the millions who presently lack even an acceptable standard of primary health care The reader is left with a clear message unless we evaluate alternatives to existing structures to bring about qualitative change in health outcomes in the developing world environmental disaster fuelled by war and international chaos is our probable destiny I am honoured to have been asked to write this forward and enthusiastically recommend it to anyone with an interest in the future of mankind

John A Gibson in his Foreword      **Sacrificing the WHO to the Highest Bidder** Theodore Macdonald,James

Raftery,2018-04-19 This remarkable book offers enlightening reading for everyone interested in international law human rights global health public health and health promotion Public health and health promotion professionals including international healthcare organisations care agencies and international charities will find the analysis illuminating It is also of great interest to policy makers and shapers in communities and government political activists and all those with an interest in equality and globalisation      Historical Dictionary of Human Rights Jacques Fomerand,2021-03-29 The second edition of Historical Dictionary of Human Rights explores both the theory and the practice of international human rights with a focus on the norms and institutions that make up the architecture of the global human rights regime and the tools processes and
