## **The Haier Electronics Group Of China:**

**International Brand Management of Chinese Companies** Sandra Bell, 2008-03-29 China is certainly doing its best to keep the world mesmerized by its economic achievements The Chinese economic growth story that begun 30 years ago has in terms of dynamics and duration long since surpassed all those economic miracles which have brought Germany Japan and the South East Asian Tigers into the top league of the industrialized world The rapid expansion of the Chinese economy has gone along with a fledgling re integration of China into the global economic system In the course of the last 30 years China has become a major player in the global economy and today is on a trajectory towards even greater prominence In recent years the Chinese economy seems to have reached an important threshold line of economic development and global integration In the first quarter century of reform and global opening Chinese enterprises have been largely confined to a passive role in the global division of labor Foreign enterprises as the proprietors of greatly superior business models production technologies management models as well as very competitively established brands have been integrating Chinese players in their value chains and global operations Lacking the necessary production technologies products as well as marketing knowledge to successfully address OECD consumers Chinese enterprises have been hardly able to enter the global markets without such guidance Now this constellation is changing

**Business Strategy and Corporate Governance in the Chinese Consumer Electronics Sector** Hailan Yang, Stephen Morgan, 2011-10-18 This book analyses how China's firms in the consumer electronics CE sector have developed their business strategy and corporate governance during the reform process The CE sector is one of China's most important and dynamic manufacturing sectors As one of the earliest market oriented sectors after 1978 its experience illustrates the adoption of the Western model of management in China This is the first book to analyse the link between business strategy corporate governance and performance of firms explicitly comparing state collective and privately owned firms This book argues that the competitive dynamics of the market are central to the survival of firms in contemporary China Focuses on the state collective and private Chinese firms in the consumer electronics sector Provides insights into the interactions among political economic and corporate factors in the China business environment that influence the strategies and performance of these firms Compares the corporate governance of these Chinese firms across different ownership forms

**The Chinese Entrepreneurship Way** Julia Perez-Cerezo, 2013-10-07 China is the

second largest economy in the world and it stands poised to become the largest China's geopolitical power is also developing at a stunning pace It has been predicted that China will have more impact on the world over the next 20 years than any other country The world order as we have known it is changing and China is becoming its leader But contrary to the belief that China's economic miracle is solely due to its government the reality is that it has been fuelled by its people's pent up ambition and entrepreneurial spirit Private owned companies account for about 60 percent of the country's gross domestic product GDP and about 75 percent of the country's jobs The real secret to the Chinese economy's outstanding development had most to do with the nature and attitude of the Chinese people This book is about models of Chinese entrepreneurship It tells the stories of fifteen women entrepreneurs but dealing with them just as entrepreneurs They have been chosen because in today's China women are closer to the junzi ideal of Confucius The book shows that Chinese entrepreneurs good performance is based on principles and values shaped over the millennia It sheds light on the approaches and rationale of the entrepreneurial paths Chinese follow A striking feature of Chinese entrepreneurs is how they all seem to go with the flow of things So they are not afraid to face risks or to start all over again They do not panic when adversities arise for they know that success will always follow adversity For Chinese entrepreneurs the world is a place where anything is possible This makes them creative and able to persevere willing to try what for others may seem impossible or unrealistic They are brimming with a unique inner strength self motivation and self control Chinese entrepreneurs have a tremendous emotional intelligence and are experts at generating new ideas and strategies They regard their employees and the building of an internal corporate culture as the soul of their business For them a crisis is an opportunity to improve and learn to focus on working hard and being efficient today in order to succeed tomorrow Chinese entrepreneurs operate in the Chinese Paradigm a paradigm which overlaps very little with our Western paradigm But while the Chinese are very familiar with Western modes of business we Westerners are unaware of how they operate This book is aimed to shine some light on this
