Content of book 1: Are you interested in going back to the basics? Do you want to learn how to develop web pages the old way? Then welcome to this guide. In the same way that a building can only be as strong as its foundation, a webpage can only be as good as the bits and pieces that hold it together. In this case, we're talking about HTML (Hyper Text Markup Language). HTML is the glue that ensures a web page is held together and can be used on many different browsers and devices successfully. It also provides the structure needed to expand your webpages using JavaScript and CSS. HTML is the backbone of any website, and it makes perfect sense to learn how to code in HTML before you try anything fancier.

Content of book 2: Build Websites with Style. A practical and easy introduction to CSS coding. The world is changing fast. The Covid-19 pandemic has taught us that the world should go online. All the products and services have turned the tables on physical work and sales. These changes have made it necessary to learn to build websites. Whether you are learning CSS coding to build your own website or you are a professional web designer, this book will help you learn CSS coding faster. If you've always dreamed of creating beautiful, easy-to-navigate web pages, then now is your chance to learn.

Content of book 3: This book is written in a practical and easy way and offers theory and plenty of practical material. There are explanations and practical examples that help beginners learn fast. Instead of diving deeper into lengthy and boring texts, I tried to get straight to the point for each topic. This book is written in an orderly form with beginner-level topics and progressively tougher topics later on.
