The Evolution Of Robert Carr:

The Evolution of Robert Carr Paul K. Lovett, 2015-04-10 Paul K Lovett's science fiction satire *The Evolution of Robert Carr* is an audacious operatic romp through a dystopian near future where genetic enhancements have pushed the divide between rich and poor ever closer to its social breaking point. The subversive tale opens on Robert Carr's eighteenth birthday when he is about to join the top 2%% of the population by becoming a recipient of an exorbitantly expensive neural enhancement procedure. Yet Robert is rather uniquely reticent to the prospect. He fears becoming distant, cold, inhuman like his enhanced best friend. And that his girlfriend, one of the revolutionary Dragoons, will spurn him. Lovett has crafted a sci fi novel with sharp social commentary that cleverly examines such issues as the staggering income gap, the emerging role of technology, and the place of religion in a tech-driven world. *Kirkus Reviews*

painting was of minor importance at the English court where the elaborately designed masques of Inigo Jones served as the

prime medium of royal representation. Only two decades later their most celebrated performer, George Villiers, the First Duke

of Buckingham, had assembled one of the largest and most significant collections of painting in early seventeenth century

Europe. His career as the personal and political favourite of two succeeding monarchs, James I and Charles I, coincides with

the commission of a number of highly ambitious portraits from the hands of Peter Paul Rubens and Anthony van Dyck that

displayed his body in spectacular manner. As the first comprehensive study of Buckingham's patronage of the visual arts, this

book is concerned with the question of how the painted image of the courtier transferred strategies of social distinction that

had originated in the masque to the language of painting. Establishing a new grammar in the competing rhetorics of bodily

self-fashioning, this recast notion of portraiture contributed to an epistemological change in perceptions of visual
