

The Egypt Code

Robert Bauval

The Egypt Code:

The Egypt Code Robert Bauval, 2007 The Orion Mystery published in 1994 introduced the world to a highly original and now internationally famous star correlation theory about the Giza Pyramids in Egypt. It sent a huge shock wave of controversy throughout the scientific community, the effects of which are still felt today. The Egypt Code develops this pyramid stars correlation, challenging the long held assumption held by many Egyptologists that the pyramids were tombs principally meant to house the bodies of dead kings. In addition to this theory, Robert Bauval also reveals an amazing Grand Unified Plan which involves the wonderful temple of Upper Egypt. The Egypt Code is unlike any other book before it and covers the whole of Egypt's ancient civilisation in a manner never before attempted.

The Egypt Code Robert Bauval, 2008-08 The Orion Mystery published in 1994 introduced the world to a highly original and now internationally famous star correlation theory about the Giza pyramids in Egypt and sent a huge shock wave of controversy throughout the scientific community, the effects of which are still felt today. The Egypt Code not only develops this pyramid stars correlation but also reveals an amazing Grand Unified Plan which involves the wonderful temple of Upper Egypt. The Egypt Code is unlike any other book before it and covers the whole of Egypt's ancient civilization in a manner never before attempted. Much has been written as to how the Egyptians might have aligned their monuments with such high precision, but the question that has always remained unanswered is why? Why did the ancients put so much emphasis on astronomical alignments? And what could be the function, practical or symbolic, behind these mysterious alignments? Robert Bauval was born in Egypt in 1948. A construction engineer, his interest in Egyptology is longstanding, having lived in Egypt and elsewhere in the Middle East for much of his life. In the 1980s he developed a line of study linking the pyramids and the so-called Pyramid Texts with astronomy and famously published the best-selling The Orion Mystery. He has also written three books with best-selling author Graham Hancock: The Message of the Sphinx, Talisman, and The Mars Mystery.

Cracking the Egyptian Code Andrew Robinson, 2012-05-01 In 1799 Napoleon's army uncovered an ancient stele in the Nile delta. Its inscription, recorded in three distinct scripts—ancient Greek, Coptic, and hieroglyphic—would provide scholars with the first clues to unlocking the secrets of Egyptian hieroglyphs, a language lost for nearly two millennia. More than twenty years later, a remarkably gifted Frenchman named Jean-François Champollion successfully deciphered the hieroglyphs on the stele, now commonly known as the Rosetta Stone, sparking a revolution in our knowledge of ancient Egypt. Cracking the Egyptian Code is the first biography in English of Champollion, widely regarded as the founder of Egyptology. Andrew Robinson meticulously reconstructs how Champollion cracked the code of the hieroglyphic script, describing how Champollion started with Egyptian obelisks in Rome and papyri in European collections, sailed the Nile for a year, studied the tombs in the Valley of the Kings—a name he first coined—and carefully compared the three scripts on the Rosetta Stone to penetrate the mystery of the hieroglyphic text. Robinson also brings to life the rivalry between Champollion and the English scientist Thomas Young, who claimed credit for launching the decipherment.
