Web Document Analysis Challenges And Opportunities:

Web Document Analysis Apostolos Antonacopoulos, Jianying Hu, 2003 This book provides the first comprehensive look at the emerging field of web document analysis. It sets the scene in this new field by combining state of the art reviews of challenges and opportunities with research papers by leading researchers. Readers will find in depth discussions on the many diverse and interdisciplinary areas within the field including web image processing applications of machine learning and graph theories, text content extraction and web mining, adaptive web content delivery, multimedia document modeling and human interactive proofs for web security. Digital Document Processing Bidyut B. Chaudhuri, 2007-03-13 In this book all

the major and frontier topics in the field of document analysis are brought together into a single volume creating a unique reference source. Highlights include Document structure analysis followed by OCR of Japanese, Tibetan and Indian printed scripts. Online and offline handwritten text recognition approaches, Japanese postal and Arabic check processing, Document image quality modelling, mathematical expression recognition, graphics recognition, document information retrieval, super resolution, text metadata extraction in digital library, Biometric and forensic aspects, individuality of handwriting detection, Web document analysis, text and hypertext mining and bank check data mining. Containing chapters written by some of the most eminent researchers active in this field, this book can serve as a handbook for the research scholar as well as a supporting book for advanced graduate students interested in document processing or image analysis. **Machine**

Learning and Data Mining in Pattern Recognition Petra Perner, Azriel Rosenfeld, 2003-06-25

The International Conference on Machine Learning and Data Mining (MLDM) is the third meeting in a series of biennial events which started in 1999, organized by the Institute of Computer Vision and Applied Computer Sciences (IBaI) in Leipzig. MLDM began as a workshop and is now a conference and has brought the topic of machine learning and data mining to the attention of the research community. Seventy-five papers were submitted to the conference this year. The program committee worked hard to select the most progressive research in a fair and competent review process which led to the acceptance of 33 papers for presentation at the conference. The 33 papers in these proceedings cover a wide variety of topics related to machine learning and data mining. The two invited talks deal with learning in case based reasoning and with mining for structural data. The contributed papers can be grouped into nine areas: support vector machines, pattern discovery, decision trees, clustering, classification and retrieval, case based reasoning, Bayesian models and methods, association rules and applications. We would like to express our appreciation to the reviewers for their precise and highly professional work. We are grateful to the German Science Foundation for its support of the Eastern European researchers. We appreciate the help and understanding of the editorial staff at Springer Verlag and in particular Alfred Hofmann who supported the publication of these proceedings in the LNAI series. Last but not least we wish to thank all the speakers and participants who contributed to the success of the conference. **Structural, Syntactic, and Statistical Pattern**
