*Rankings and Accountability in Higher Education: Uses and Misuses* Priscilla Toka Mmantsetsa Marope, Peter J. Wells, Unesco, Ellen Hazelkorn, 2013-01-01 The growing impact of university rankings on public policy and on students' choices has stirred controversy worldwide. This unique volume brings together the architects of university rankings and their critics to debate the uses and misuses of existing rankings. With voices from five continents it provides a comprehensive overview of current thinking on the subject and sets out alternative approaches and complementary tools for a new era of transparent and informed use of higher education ranking tables

## Global Perspectives on Teaching Excellence

Christine Broughan, Graham Steventon, Lynn Clouder, 2018-02-02 Teaching excellence in higher education needs to be promoted and celebrated. However a universal definition of excellent teaching remains elusive and robust evidence about how it affects student learning appears to be lacking. This timely book explores the notion of teaching excellence from the viewpoint of a variety of international authors guiding the reader to understand the complex terrain in which teaching excellence is foregrounded and highlighting a number of key issues facing the future of global higher education. Global Perspectives on Teaching Excellence explores what is meant by teaching excellence whether it can be measured and if so how the impact of teaching excellence frameworks, initiatives and awards the new challenges for delivering global teaching excellence fit for the 21st century. With a mix of political, theoretical and applied research foci each chapter also includes a short critical commentary from international experts in the field to further the debate and situate the topics in a wider context. Global Perspectives on Teaching Excellence is essential reading for academic and education policymakers, researchers and undergraduate and postgraduate students in education.

**The Heir** Matt Palumbo, 2025-10-28 As Seen on Steve Bannon's War Room The George Soros empire is now the Alex Soros empire and the son is more radical than the father. Like father like son. In June 2023 it was finally made official. Alex Soros would be taking over the empire started by his father who has contributed 32 billion of his own money to the cause. As the news broke one question echoed around the world: What will the future of Soros's influence look like? The Heir investigates the transformation underway. This is not the end of Soros-backed radicalism it's just the beginning.

**Peak Higher Ed** Bryan Alexander, 2026-01-06 Mapping out the strategic future of higher education. Over the past decade American colleges and universities have seen enrollment decline, campuses close, programs cut, faculty and staff laid off, and public confidence erode. In Peak Higher Ed, futurist Bryan Alexander forecasts what the next decade might hold if we continue down this path. He argues that the United States has passed its high-water mark for postsecondary education and now faces a critical turning point. How will higher ed institutions respond to this wave of change and crisis? Combining data-driven research with scenario modeling, Alexander outlines a powerful framework for understanding what led to this moment: declining birthrates, surging student debt, rising tuition, shifting political winds, and growing skepticism about the value of a college degree. He maps out how these forces, if left unchecked, could continue to

reshape academia by shrinking its footprint narrowing its mission and jeopardizing its role in addressing the planet's most pressing challenges from climate change to artificial intelligence Alexander explores how institutions might adapt or recover presenting two possible futures a path of managed descent and a more hopeful course of reinvention Peak Higher Ed examines the fraying of the college for all consensus the long shadow of pandemic era disruptions and the political polarization that has placed universities in the crosshairs Written for educators policymakers students and anyone invested in the future of higher learning this book offers a deeply informed unflinching look at the road ahead and the choices that will determine whether colleges and universities retreat from their peak or rise to a new one

[The Chronicle of Higher Education Almanac ,2010](#)    [Alternative Pathways to the Baccalaureate Nancy Remington,Ronald Remington,2023-07-03](#)

This book does an excellent job of tracing the history of the movement and where it stands today It discusses the political context when these discussions happen in states and the education implications when institutions take on this additional mission This book may or may not convert those who are concerned about mission creep of community colleges but it sure will give them something to think about Clearly we cannot continue to do business as we have always done and expect to meet the growing demand for college educated citizens This book provides some thoughts on how to create a new model going forward and it deserves serious consideration from the Foreword by Carol D AmicoThe premise of this book is that in a globalized economy dependent on innovation and knowledge higher education must provide greater more affordable access to the acquisition of higher level skills and knowledge for a greater proportion of the population The purpose of this book is to open up a debate about the status quo Should four year institutions remain the near exclusive conferrers of the baccalaureate Or is there a legitimate role for community colleges who already educate over half the undergraduate population of the United States at lower cost with few barriers to access The contributors examine the capacities of four year colleges to deliver training for technical occupations the ability of community colleges to deliver rigorous high quality courses and issues of access affordability faculty development and responsiveness to changing needs A chapter devoted to student voices provides the critical perspective of this constituency The book concludes by describing examples of implementation across the United States reviewing different models of articulation as well as promising practices that include eliminating the need for transfer altogether Alternative Pathways to the Baccalaureate provides vital information and new research for policymakers community college leaders and scholars of higher education to provoke much needed debate

of Global Focus the EFMD has selected around 25 of the best most thoughtful short papers published in Global Focus to examine the role and purpose of EFMD in the evolution of management education Each of the chapters interpret current strategic debates about the evolution of business schools and their paradigms and also identify possible strategic options for handling uncertain volatile futures These papers can be broadly categorized into four consistent themes the first theme is concerned with the purpose and value proposition of management education the second theme focuses on a perceived need for new business models and how to design and build them the third theme addresses the question of the impact of the business school on business and society given the increasingly academic pursuits of business schools and their often weak links to the business community the so called rigour relevance dilemma and the fourth theme concerns how to map and design business school futures in an increasingly volatile uncertain complex and ambiguous crisis oriented environment This impressive collection of insights from business management leaders from across the globe is inspiring reading for higher education leaders policy makers and business leaders seeking insight into the future of management education The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license
