### **Customer Service for Hospitality and Tourism** Simon

Hudson, Louise Hudson, 2012-11-02 Customer service is of critical importance for the tourism and hospitality sector now more than ever before as customers are looking to increase value for money and are less forgiving of mediocre service. However, despite its importance, quality customer service is the exception rather than the norm in many parts of the world. *Customer Service for Hospitality and Tourism* is a unique text and vital to both students and practitioners as it explains not only the theory behind the importance of customer service but also acts as a guidebook for those wishing to put this theory into practice. In essence, it is the whys and hows of customer service. It is easy to read, very current, and full of references to all the latest research from both academic and practitioner literature. Chapters cover important topics such as the financial and behavioural consequences of customer service, consumer trends influencing service, developing and maintaining a service culture, managing service encounters, the importance of market research, building and maintaining customer relationships, providing customer service through the servicescape, the impact of technology on customer service, the importance of service recovery, and promoting customer service internally and externally. Key features include: An At Your Service Spotlight at the beginning of each chapter focuses on the achievements of successful individuals related to the art of customer service. Each chapter contains a Service Snapshot, short real-life cases to illustrate a particular concept or theoretical principle presented in the chapter. Detailed international Case Studies which cover a variety of sectors, organizations, and regions designed to foster critical thinking. The cases illustrate actual business scenarios that stress several concepts found in the chapter. They analyze customer service in the U.S., South America, South Africa, Europe, Russia, Australia, China, Canada, Korea, and Dubai.

### **Electronic Commerce 2018** Efraim Turban, Jon Outland, David King, Jae Kyu Lee, Ting-Peng Liang, Deborah C.

Turban, 2017-10-12 This new Edition of *Electronic Commerce* is a complete update of the leading graduate level advanced undergraduate level textbook on the subject. Electronic commerce (EC) describes the manner in which transactions take place over electronic networks, mostly the Internet. It is the process of electronically buying and selling goods, services, and information. Certain EC applications, such as buying and selling stocks and airline tickets online, are reaching maturity, some even exceeding non-Internet trades. However, EC is not just about buying and selling; it also is about electronically communicating, collaborating, and discovering information. It is about e-learning, e-government, social networks, and much more. EC is having an impact on a significant portion of the world, affecting businesses, professions, trade, and, of course, people. The most important developments in EC since 2014 are the continuous phenomenal growth of social networks, especially Facebook, LinkedIn, and Instagram, and the trend toward conducting EC with mobile devices. Other major developments are the expansion of EC globally, especially in China, where you can find the world's largest EC company. Much attention is lately being given to smart commerce and the use of AI-based analytics and big data to enhance the field. Finally, some emerging EC business models are changing industries, e.g., the shared economy models of Uber and Airbnb. The 2018 9th edition brings

forth the latest trends in e commerce including smart commerce social commerce social collaboration shared economy innovations and mobility      **College & Research Libraries News** ,2009      **Oracle Big Data Handbook** Tom Plunkett,Brian Macdonald,Bruce Nelson,Mark Hornick,Helen Sun,Khader Mohiuddin,Debra Harding,Gokula Mishra,Robert Stackowiak,Keith Laker,David Segleau,2013-10-06 Transform Big Data into Insight In this book some of Oracle s best engineers and architects explain how you can make use of big data They ll tell you how you can integrate your existing Oracle solutions with big data systems using each where appropriate and moving data between them as needed Doug Cutting co creator of Apache Hadoop Cowritten by members of Oracle s big data team Oracle Big Data Handbook provides complete coverage of Oracle s comprehensive integrated set of products for acquiring organizing analyzing and leveraging unstructured data The book discusses the strategies and technologies essential for a successful big data implementation including Apache Hadoop Oracle Big Data Appliance Oracle Big Data Connectors Oracle NoSQL Database Oracle Endeca Oracle Advanced Analytics and Oracle s open source R offerings Best practices for migrating from legacy systems and integrating existing data warehousing and analytics solutions into an enterprise big data infrastructure are also included in this Oracle Press guide Understand the value of a comprehensive big data strategy Maximize the distributed processing power of the Apache Hadoop platform Discover the advantages of using Oracle Big Data Appliance as an engineered system for Hadoop and Oracle NoSQL Database Configure deploy and monitor Hadoop and Oracle NoSQL Database using Oracle Big Data Appliance Integrate your existing data warehousing and analytics infrastructure into a big data architecture Share data among Hadoop and relational databases using Oracle Big Data Connectors Understand how Oracle NoSQL Database integrates into the Oracle Big Data architecture Deliver faster time to value using in database analytics Analyze data with Oracle Advanced Analytics Oracle R Enterprise and Oracle Data Mining Oracle R Distribution ROracle and Oracle R Connector for Hadoop Analyze disparate data with Oracle Endeca Information Discovery Plan and implement a big data governance strategy and develop an architecture and roadmap      *Impact of Facebook Usage on Students Academic Performance* Fromsa Bedassa,2014-07-29 Thesis M A from the year 2014 in the subject Business economics Offline Marketing and Online Marketing language English abstract Today Facebook is considered as one of the most popular platforms for online social networking among youth and as many researches show university students The purpose of this study is to assess the impact of social networking sites i e Facebook on students academic performance The study was carried out in Wollega University with regular undergraduate students in focus A questionnaire was designed to assess impact of Facebook usage on Student and was administered to 384 students selected using stratified sampling technique Variables identified are time spent on Facebook addiction to Facebook and academic performance The Pearson product moment correlation coefficient was used to examine the relationship between addiction to Facebook and time spent on Facebook and students academic performance Furthermore a multiple linear regression was carried out to determine the
