Think of the M1 Chip as an unnecessarily long S shaped road from your home to your office school that was unnecessarily long due to the many curves. You would agree that making a straight road from the house to your office if that were possible would make the journey considerably shorter hence saving you time and gas. Similarly tasks on the M1 powered MacBook Pro consume less time and energy than similar tasks on an Intel powered MacBook because Apple has removed all the barriers and unified everything into a single chip. The M1 MacBook Pro is one of the first devices to debut the new Apple M1 chip and it takes everything good about the Intel TM version of the MacBook Pro and makes it even better. The M1 MacBook Pro appears the same as that of the Intel on the outside but don't be deceived it has a powerful new processor internally.
