This book provides the fundamentals of the application of mathematical methods modern computational tools Excel, Mathcad, SMath etc and the Internet to solve the typical problems of heat and mass transfer, thermodynamics, fluid dynamics, energy conservation and energy efficiency. Chapters cover the technology for creating and using databases on various properties of working fluids, coolants and thermal materials. All calculation methods are provided with links to online computational pages where data can be inserted and recalculated. It discusses tasks involving the generation of electricity at thermal, nuclear, gas turbine and combined cycle power plants as well as processes of co and trigeneration, conditioning facilities and heat pumps. This text engages students and researchers by using modern calculation tools and the Internet for thermal engineering applications.

[Guide to Numerical Algorithm Design and Development](#) George Delic, 2025-10-27. The focus of this unique textbook reference is on numerical algorithms that are stable and provide high precision in common numerical problems encountered in large scale modeling projects. The techniques presented are based on algorithms developed by the author over six decades of research and publications in peer reviewed journals. The exposition includes topics typical of numerical analysis courses and is supplemented with examples of algorithms demonstrated in an engineering worksheet that is easy to read and comprehend. Each chapter ends with exercises and programming problems. Additional examples are available as downloadable Fortran code based on the author's large scale models in computational physics. The limitations of commodity processors and modern compilers is discussed with advice provided on how to control them in an algorithm's code design. An ample bibliography of over 200 citations provides a guide to further reading. Topics, features and emphases if supportLists endif Stability knowing the range of algorithm parameters for producing reliable results if supportLists endif Accuracy understanding convergence to a result through quantitative

metrics if supportLists endif Precision advance knowledge of the expected numerical precision and how to control it if supportLists endif Efficiency translating an algorithm into code with limited redundant computation The primary target audience of this textbook guide are senior graduate or postgraduate students in computer science and scientific or engineering fields who are starting on a career path as the next generation of model developers for high performance computing HPC Additionally the book will appeal to professionals engaged in large scale computer model development who could use the volume as a course supplement or reference The author is an Honorary Fellow of the University of Wollongong New South Wales Australia He is active as a private consultant in HPC and CEO of HiPERiSM Consulting LLC in the United States of America Thermal Radiation Heat Transfer John R. Howell, M. Pinar Menguc, Robert Siegel, 2015-09-18 Explore the Radiative Exchange between Surfaces Further expanding on the changes made to the fifth edition Thermal Radiation Heat Transfer 6th Edition continues to highlight the relevance of thermal radiative transfer and focus on concepts that develop the radiative transfer equation RTE The book explains the fundamentals of radiative transfer introduces the energy and radiative transfer equations covers a variety of approaches used to gauge radiative heat exchange between different surfaces and structures and provides solution techniques for solving the RTE What's New in the Sixth Edition This revised version updates information on properties of surfaces and of absorbing emitting scattering materials radiative transfer among surfaces and radiative transfer in participating media It also enhances the chapter on near field effects addresses new applications that include enhanced solar cell performance and self regulating surfaces for thermal control and updates references Comprised of 17 chapters this text Discusses the fundamental RTE and its simplified forms for different medium properties Presents an intuitive relationship between the RTE formulations and the configuration factor analyses Explores the historical development and the radiative behavior of a blackbody Defines the radiative properties of solid opaque surfaces Provides a detailed analysis and solution procedure for radiation exchange analysis Contains methods for determining the radiative flux divergence the radiative source term in the energy equation Thermal Radiation Heat Transfer 6th Edition explores methods for solving the RTE to determine the local spectral intensity radiative flux and flux gradient This book enables you to assess and calculate the exchange of energy between objects that determine radiative transfer at different energy levels Automotive Engineering , 1991 **Subject Guide to Books in Print** , 2001 **Software Reviews on File** , 1988 **American Journal of Physics** , 1990 *Subject Guide to Children's Books in Print* 1997 Bowker Editorial Staff, R R Bowker Publishing, 1996-09

Fuzzy Methods for Assessment and Decision Making Michael Gr. Voskoglou, 2024-10-08 Fuzzy Methods for Assessment and Decision Making presents the assessment of learning and problem solving skills with qualitative grades These methods are outcomes of the author's research work on the subject for more than 20 years In particular a hybrid assessment model uses the Center of Gravity COG defuzzification technique closed real intervals grey numbers neutrosophic sets and soft sets as tools The book starts with the basic mathematical background that

is needed for an understanding of its contents The Rectangular Fuzzy Assessment Model RFAM of Subbotin and Voskoglou is presented next the outcomes of which are compared to those of the GPA index The book presents innovative fuzzy assessment methods enabling readers to assess the mean and quality performance of learning or problem solving skills of a group of students when qualitative linguistic grades are used for this purpose In the case of using linguistic grades for the assessment of a group's skills the classical method of calculating the mean value of the numerical grades cannot be applied Also no safe conclusions can be obtained on comparing the quality performance of two groups when the values of their GPA index are equal Presents innovative fuzzy assessment methods to enable readers to assess the mean and quality performance of learning Discusses fuzzy logic and techniques for decision making in all domains Includes applications of fuzzy decision making as a hybrid model using soft sets grey numbers and neutrosophic sets     **Archives of Acoustics Quarterly** ,2007
