blueprint you will learn how to set up your initial identity provider and create an organization. Further on you will configure your users and groups, enable administrative access and set up billing. Next you will create a resource hierarchy, configure and control access and enable a cloud network. Later chapters will guide you through configuring monitoring and logging, adding additional security measures and enabling a support plan with Google. By the end of this book you will have an understanding of what it takes to leverage Terraform for properly building a Google Cloud foundational layer that engenders security, flexibility and extensibility from the ground up. What you will learn:

- Create an organizational resource hierarchy in Google Cloud
- Configure user access permissions and key Google Cloud Platform (GCP) security groups
- Construct well thought out, scalable and secure virtual networks
- Stay informed about the latest logging and monitoring best practices
- Leverage Terraform infrastructure as code automation to eliminate toil
- Limit access with IAM policy bindings and organizational policies
- Implement Google's secure foundation blueprint

Who this book is for:

This book is for anyone looking to implement a secure foundational layer in Google Cloud, including cloud engineers, DevOps engineers, cloud security practitioners, developers, infrastructural management personnel and other technical leads. A basic understanding of what the cloud is and how it works, as well as a strong desire to build out Google Cloud infrastructure the right way, will help you make the most of this book. Knowledge of working in the terminal window from the command line will be beneficial.
