## **Mortgage Rates 2025:**

**World Bank East Asia and Pacific Economic Update, April 2025** Weltbank, 2025 East Asia and the Pacific remains one of the most dynamic regions in the world. Yet when measured against its own past performance and potential the region has under performed. Growth in most economies and even output in several Pacific Island economies has not returned to pre-pandemic levels. Now rising global uncertainty is further dampening regional economic prospects. Uncertainty increases financing costs and hurts business and consumer confidence, inhibiting investment and consumption. However, short-term uncertainty should not obscure long-term trends in globalization, climate, and demographics that will affect trade growth and jobs in the EAP region. These development challenges have been individually discussed in past Updates. But an integrated analysis may help policymakers take a longer view through the current fog of uncertainty of what ultimately matters and what needs to be done. This report illustrates the benefits of a synchronized three-pronged approach: harnessing technological change, pursuing domestic reforms, and deepening international cooperation.

Republic of Estonia International Monetary Fund, European Dept., 2023-07-28 Estonia has made remarkable progress over the past two decades, achieving steady convergence towards more advanced EU economies. However, signs of erosion in external performance have emerged in recent years, reflecting rapid growth in unit labor cost and real exchange rate appreciation. Russia's invasion of Ukraine triggered a large rise in inflation, supply chain disruptions, and slower growth in key trading partners in the Baltic region. In Estonia, these developments combined with fiscal tightening in 2022 have led to a sharp economic downturn while deceleration in productivity has exacerbated competitiveness erosion.
