**A History of the World in 12 Maps** Jerry Brotton,2013-11-14 A New York Times Bestseller Maps allow the armchair traveler to roam the world the diplomat to argue his points the ruler to administer his country the warrior to plan his campaigns and the propagandist to boost his cause rich and beautiful Wall Street Journal Throughout history maps have been fundamental in shaping our view of the world and our place in it But far from being purely scientific objects maps of the world are unavoidably ideological and subjective intimately bound up with the systems of power and authority of particular times and places Mapmakers do not simply represent the world they construct it out of the ideas of their age In this scintillating book Jerry Brotton examines the significance of 12 maps from the almost mystical representations of ancient history to the satellite derived imagery of today He vividly recreates the environments and circumstances in which each of the maps was made showing how each conveys a highly individual view of the world Brotton shows how each of his maps both influenced and reflected contemporary events and how by considering it in all its nuances and omissions we can better understand the world that produced it Although the way we map our surroundings is more precise than ever before Brotton argues that maps today are no more definitive or objective than they have ever been Readers of this beautifully illustrated and masterfully argued book will never look at a map in quite the same way again A fascinating and panoramic new history of the cartographer s art The Guardian The intellectual background to these images is conveyed with beguiling erudition There is nothing more subversive than a map The Spectator A mesmerizing and beautifully illustrated book The Telegraph

**Automotive News** ,2007 Sideways Josh O'Kane,2022-09-13 NATIONAL BESTSELLER FINALIST FOR THE WRITERS TRUST SHAUGHNESSY COHEN PRIZE FOR POLITICAL WRITING From the Globe and Mail tech reporter who revealed countless controversies while following the Sidewalk Labs fiasco in Toronto an uncompromising investigation into the bigger story and what the Google sister company s failure there reveals about Big Tech data privacy and the monetization of everything When former New York deputy mayor Dan Doctoroff landed in Toronto promising a revolution in better living through technology the locals were starstruck In 2017 a small parcel of land on the city s woefully underdeveloped lakeshore was available for development and with Google co founder Larry Page and his trusted chairman Eric Schmidt leaning into

Sidewalk Labs pitch for the long forsaken property with Doctoroff as the urban planning company's CEO Sidewalk's bid crushed the competition But as soon as the bid was won cracks appeared in the partnership between Doctoroff's team and Waterfront Toronto the government sponsored organization behind the contest There were hundreds more acres of undeveloped former port lands nearby that kept creeping into conversation with Sidewalk and more questions were emerging than answers about how much the public would actually benefit from the Alphabet owned company's vision for the high tech neighbourhood and the data it could harvest from the people living there Alarm bells began ringing in the city's corridors of power and activism To Torontonians accustomed to big promises with little follow through the fiasco that unfolded seemed at first like just another city building sideshow But the pained battle to reel in the power of Sidewalk Labs became a crucible moment in the worldwide battle for privacy rights and against the extension of Big Tech's digital might into the physical world around us With extensive contacts on all sides of the debacle O Kane tells a story of global consequence fought over a small forgotten parcel of mud and pavement taking readers from California to New York to Toronto to Berlin and back again In the tradition of extraordinary boardroom dramas like *Bad Blood* and *Super Pumped* Sideways vividly recreates the corporate drama and epic personalities in this David and Goliath battle that signalled to the world that all may not be lost in the effort to contain the rapidly growing power of Big Tech

Metaphor Studies: Theories, Methods, Approaches, and Future Perspectives Ilaria Rizzato, Valentina Cuccio, Aletta Gesina Dorst, 2024-12-12 Metaphor has been studied as a linguistic conceptual and communicative phenomenon in a wide range of disciplines including linguistics literary studies philosophy education political science media studies communication science psychology and neurosciences While the Cognitive Theory of Metaphor has dominated the field since the cognitive turn in the 1980s alternatives have been proposed including the Neural Theory of Metaphor the Relevance Theory Approach the Complex Systems Approach and the Dynamic Systems Approach Though studies are still often text based there is a growing body of research on visual metaphor multimodal metaphor and gestural metaphor as well as experimental research ranging from studies on metaphor processing and comprehension to studies in NLP and machine learning Metaphor Studies is thus a highly interdisciplinary field that encompasses a myriad of theories approaches and methods In current metaphor research each of these strands is facing new challenges and offering new venues of cutting edge research using state of the art technologies Researchers tend to focus on their own research areas and provide in depth views within the scope of their own disciplines Metaphor Studies do not seem to escape this phenomenon in spite of the large number of disciplines they draw on ranging from linguistics to psychology to the theory of science Hence there seem to be little cooperation and communication across different fields methods and approaches having metaphors and figurative language as their main object of investigation This Research Topic aims to promote cross fertilization among the many research areas involved in Metaphor Studies thus bringing together different methods and perspectives and offering a comprehensive overview of the possible research scenarios
