Just Here for the Comments Gina Sipley, 2024-05-28 We all sometimes lurk in online spaces without posting or engaging just reading the posts and comments

But neither reading nor lurking are ever passive acts. In fact, readers of social media are making decisions and taking grassroots actions on multiple dimensions. Unpacking this understudied phenomenon, this book challenges the conventional perspective of what counts as participatory online culture. Presenting lurking as a communication and literacy practice that resists dominant power structures, it offers an innovative approach to digital qualitative methods. Unique and original in its subject, this is a call for internet researchers to broaden their methods to include lurkers' participation and presence.

We once idolized tech entrepreneurs for creating innovations that seemed like modern miracles. Yet our faith has been shattered. We now blame them for spreading lies, breaking laws, and causing chaos. Yesterday's Silicon Valley darlings have become today's Big Tech villains. Which is it? Are they superheroes or scoundrels? Or is it more complicated, some blend of both? In *The Venture Alchemists*, Rob Lalka demystifies how tech entrepreneurs built empires that made trillions. Meta started as a cruel Halloween prank. Alphabet began as a master's thesis that warned against corporate deception, and Palantir came from a campus controversy over hateful speech. These largely forgotten origin stories show how ordinary fears and youthful ambitions shaped their ventures, making each tech tale relatable, both wonderfully and tragically human. Readers learn about the adversities tech entrepreneurs overcame, the troubling tradeoffs they made, and the tremendous power they now wield. Using leaked documents and previously unpublished archival material, Lalka takes readers inside Big Tech's worst exploitations and abuses alongside many good intentions and moral compromises. But this story remains unfinished, and *The Venture Alchemists* ultimately offers hope from the people who decades ago warned about the risks of the emerging Internet. Their insights illuminate a path toward more responsible innovations, so that technologies aren't dangerous weapons but valuable tools that ensure progress, improve society, and enhance our daily lives.
