**Politics and the Architecture of Choice** Bryan D. Jones, 2001-05

Politics and the Architecture of Choice draws on work in political science economics cognitive science and psychology to offer an innovative theory of how people and organizations adapt to change and why these adaptations don't always work Our decision making capabilities Jones argues are both rational and adaptive But because our rationality is bounded and our adaptability limited our actions are not based simply on objective information from our environments Instead we overemphasize some factors and neglect others and our inherited limitations such as short term memory capacity all act to affect our judgment Jones shows how we compensate for and replicate these limitations in groups by linking the behavioral foundations of human nature to the operation of large scale organizations in modern society Situating his argument within the current debate over the rational choice model of human behavior Jones argues that we should begin with rationality as a standard and then study the uniquely human ways in which we deviate from it

**Politics in War** Allan E. Goodman, 1973 Internal war does not create politics or processes of government This is likely to be the most tragic aspect of the war in Vietnam When the guns are silent the political analyst will find essentially the same political forces and governmental institutions intact as when the conflict began Politics in War deals mainly with the years 1967-1970 but bears on the problems South Vietnam faces now that American forces are no longer active The book provides an understanding of Vietnamese politics the forces underlying it and the bases upon which political community and a future political settlement might be achieved Mr Goodman has based his analysis on first hand research He conducted over 300 interviews with Vietnamese political leaders and government officials His field work in South Vietnam encompassed three years and he presents materials from such sources as South Vietnam's National Assembly its Ministry of Interior and the U S Department of State's Vietnam Working Group Politics in War presents the untold story of how the Vietnamese saw the period of deepest American involvement Goodman supplies background material on the Thieu government its motivations

and its response to the people Students of politics who have been concerned about what the Vietnam involvement meant to America can now better assess what the last decade has meant to the Vietnamese
