Leitz III, 2012-05-18 Scholars librarians students and database vendors have all applauded the increase in access to rare old venerated and obscure texts that has resulted from the rise of electronic resources Almost everyone associated with any branch of cultural history has heard the claims about unlimited research opportunity and the

rediscovery of overlooked sources But are these claims true Have high tech systems and methods enhanced or inhibited scholarship Nowhere is this question more pressing than in the area of eighteenth century studies where so much of the subject matter relates to the first wave of informational abundance to that great period of profuse printing during which presses produced a mass market full of diverse readers Textual Studies and the Enlarged Eighteenth Century probes the assumptions about the advanced tools that may be replicating this period of profusion among contemporary scholars How much access to period information do current cost and present institutional support really allow Who is accessing what and who is not Which authors and which topics get lost in the processor driven shuffle How do electronic tools bias scholarship What are the disadvantages of databases These and many more questions receive a brisk and robust review in this first critique of new wave research A variety of acclaimed scholars from an interdisciplinary array of specialties look at topics ranging from legacy bibliographical projects to standards for online editions to para textual materials to the appropriateness of importing electronic research techniques into the study of a low tech period and on to the transatlantic exchange of information in both the early modern and the present periods Scholars in all fields will benefit from this vigorous analysis of the assumptions underlying the tools and the methods of twenty first century humanities scholarship *The Academy* ,1885
