Deepfakes Graham Meikle,2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone s face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the public and the personal converge and in which all human experience becomes data to be shared Timely clear and accessibly written this is an essential text for students and scholars of media communication cultural studies and sociology as well as general readers
