Energy Economics Peter M. Schwarz, 2022-10-24 *Energy Economics* outlines the fundamental issues and possible solutions to the challenges of energy production and use presenting a framework for decisions based upon sound economic analysis. This approach considers market forces and policy goals including economic prosperity, environmental protection, and societal well-being. The second edition has been thoroughly updated, addressing dramatic shifts in the use of fuel and electricity, accelerated plans for the use of renewable energy, and pathways towards a lower carbon future. A new chapter on electric vehicles examines its impact on transportation, the electricity market, and carbon emissions. Global examples throughout the book reflect the universal application of energy economics. With this economic foundation coupled with perspectives from real world applications and perspectives from related disciplines, this text sharpens the student's ability to understand, evaluate, and critique energy policy. A companion website provides reinforcement for students through multiple choice, self-test quizzes, and homework exercises, as well as additional materials for instructors. This textbook should be essential reading for students of energy economics, environmental and natural resource economics, energy-related disciplines, and general readers seeking to expand their knowledge of energy economics and policy.

Jump Start Web Performance Craig Buckler, 2020-02-11 Despite working on the web every day, few developers have a good word to say about the monster they've created. Aching, slow sites with annoying overlays, cookie agreements, instant notifications, and obtrusive ads litter the web landscape. While there may be some excuses for complex web applications, there's little justification for sluggish content-based and e-commerce sites. People are notoriously impatient, and an unresponsive site receives fewer visitors and conversions. This practical short book provides advice, tips, and best practice for improving website performance, ranging from quick five-minute configuration changes to major website overhauls. We primarily concentrate on front-end activities and server configurations to optimize the code delivered to a browser. Some back-end tips are provided, but this is often specific to your application, framework, database, and usage patterns. Server-side performance can often be improved with additional or more powerful computing resources. Ideally, everyone involved in a project would consider performance from the start. Somewhat understandably, that rarely occurs because no one can appreciate the speed of a website or application before it's been created. Many of the tips contained in this book can therefore be applied after your project has been delivered.

Films That Spill Marie Sophie Beckmann, 2025-03-11 *Films That Spill* is a comprehensive study of the Cinema of Transgression, a hitherto underexamined moment in US underground film culture. Reconsidering the concept of transgressive cinema, not only as a description of the intentionally provocative content of the films, but also as a feature of a cross-disciplinary practice, Marie Sophie Beckmann explores how filmmaking in the context of the vibrant and intermingling art, music, performance, and film scenes in 1980s Lower Manhattan spilled over the boundaries of artistic disciplines, media formats, and content concepts. This study not only provides a microhistory of these scenes and insight into their afterlife in archives and exhibitions, but also

represents an innovative contribution to debates within film media and visual culture about the methodological and historiographical challenges posed by the expansion of film beyond the discursive boundaries of cinema *Farmer's Weekly* ,1922 **The Builder** ,1910-07 **Chain Store Age** ,1958 **EDN.** ,1983 **Better Fruit, Better Vegetables** ,1909 **Contract Record** ,1937 **Engineering & Contract Record** ,1937 The Oil and Gas Journal ,1938 **George Broomhall's Corn Trade News** ,1903 **A New English Dictionary on Historical Principles** James Augustus Henry Murray, Sir William Alexander Craigie, Charles Talbut Onions, 1919 **"A" New English Dictionary on Historical Principles** William A.
