

## Pressure Switches for Process Applications

### General Instructions

NN

These instructions provide information for electrical connection, installation, process connection, and calibration. If the switch is a pivot seal sensor type (piston 2 or 3), it is recommended for high-pressure fluid power applications where high-shock pressure and high-cycle rates are expected. Pivot seal sensors are designed specifically for those applications.

### Electrical Connection

*Electrical Power must be disconnected from explosion-proof models before the cover is removed. Failure to do so could result in severe personal injury or substantial plant damage.*

Storing excess wire or making wire lead splices inside the pressure switch housing will interfere with pressure switch operation.
