The Mediator's Handbook John W. Cooley, 2006      Fables of Development: Capitalism and Social Imaginaries in Spain (1950-1967) Ana Fernández-Cebrián, 2023-05-15 An Open Access edition of this book is available on the Liverpool University Press website and the OAPEN library as part of the Opening the Future project with COPIM Fables of Development Capitalism and Social Imaginaries in Spain 1950 1967 focuses on a basic paradox why is it that the so called Spanish economic miracle a purportedly secular rational and technocratic process was fictionally portrayed through providential narratives in which supernatural and extraordinary elements were often involved In order to answer this question this book examines cultural fictions and social life at the time when Spain turned from autarchy to the project of industrial and tourist development Beyond the narratives about progress modernity and consumer satisfaction on a global and national level the cultural archives of the period offer intellectual findings about the expectations of a social majority who lived in the precariousness and who did not have sufficient income to acquire the consumer goods that were advertised Through the scrutiny of interdisciplinary archives literary texts cinema newsreels comics and journalistic sources among other cultural artifacts each chapter offers an analysis of the social imaginaries about the circulation and distribution of capital and resources in the period from 1950 when General Franco's government began to integrate into international markets and institutions following its agreements with the United States to 1967 when the implementation of the First Development Plan 1964 1967 was completed      Facts and Fables (RLE Israel and Palestine) Clifford A. Wright, 2015-05-22 The Arab Israeli conflict is one of the greatest threats to world peace today Yet for all the importance and passion of this conflict very little is actually known about the story behind the headlines Behind each confrontation and each act of terrorism is a long and deep story This primer on the Arab Israeli conflict first published in 1989 examines the real stories behind the conflict and separates fact from fable By carefully documenting each claim and counter claim many widely held beliefs are unmasked as myths      Multilateral Negotiation and Mediation Arthur S. Lall, 2014-05-17 Multilateral Negotiation and Mediation Instruments and Methods is a collection of papers that covers various areas of concerns in international mediation and negotiation The materials examine the several aspects negotiation and mediation The title first covers negotiations with security councils and then proceeds to tackling regional and inter regional negotiations Next the selection deals with the small state factor in dispute settlement The text also talks about disarmament negotiations and north south negotiations The last chapter covers international law and negotiation The book will be of great use diplomats government officials and political scientists Readers who have a keen interest on the mechanisms of diplomacy will also benefit from the text      Fables of the Law Daniela Carpi, Marett Leiboff, 2016-10-24 The latest development concerning the metaphorical use of the fairy tale is the legal perspective The law had and has recourse to fairy tales in order to speak of the nomos and its subversion of the politically correct and of the various means that have been used to enforce the law Fairy tales are a

fundamental tool to examine legal procedures and structures in their many failings and errors Therefore we have privileged the term fables of the law just to stress the ethical perspective they are moral parables that often speak of justice miscarried and justice sought Law and jurists are creators of fables on the view that law is born out of the facts *ex facto ius oritur* so that there is a need for narrative coherence both on the level of the case and the level of legislation or turned the other way around what does it mean if no such coherence is found This is especially of interest given the influx of all kinds of new technologies that are fabulous in themselves and hard to incorporate in traditional doctrinal schemes and thus in the construction of a new reality
