[The Pedagogical Imagination](#) Leon Sachs, 2014-05-01

French school debates of recent years, which are simultaneously debates about the French Republic's identity and values, have generated a spate of internationally successful literature and film on the topic of education. While mainstream media and scholarly essays tend to treat these works as faithful representations of classroom reality, *The Pedagogical Imagination* takes a different approach. In this study of French education and republicanism as represented in twenty-first-century French literature and film, Leon Sachs shifts our attention from what literature and film say about education to how they say it. He argues that the most important literary and filmic treatments of French education in recent years—the works of Agnès Varda, Rik Orsenna, Abdellatif Kechiche, François Billaudot—do more than merely depict the present.
