Getting Skills Right Training Supply for the Green and AI Transitions Equipping Workers with the Right Skills OECD, 2024-12-11

Adult learning systems are being called upon to prepare workers for major labour market shifts including the green transition and the rise of artificial intelligence AI in the workplace. While initial education is important, upskilling and reskilling the existing workforce is essential to help individuals and businesses adapt and prepare for these transitions. Policy makers face the challenge of ensuring training is both relevant and inclusive, yet there is limited understanding of whether current training supply is sufficient to meet current and future skill needs. Most research focuses on the demand for skills with little insight into the supply. To fill this gap, this report uses evidence from new OECD questionnaires and an analysis of training catalogues to evaluate whether current training supply aligns with the skills needed for the green and AI transitions. It also provides insight into the accessibility and flexibility of training efforts to guide policy makers in their efforts to develop more effective, inclusive training strategies.

Teaching Information Seeking Jon Ostenson, 2025-05-30

Teaching Information Seeking redefines how we approach research and information literacy in today's information-rich world, inviting teachers to reimagine teaching research. The book combines insights from fields such as library and information sciences, journalism, and media literacy to offer fresh strategies and perspectives for guiding students through evolving landscapes of information. While a focus on concepts and skills has long been important in teaching research, this book integrates significant new understandings about the role dispositions play in how well students embrace and utilize skill-based knowledge. The book provides conceptual knowledge and learning activities that support writing teachers as they help students learn throughout the research or inquiry process of asking questions, finding information, and sharing their learning purposefully and ethically. Chapters with a pedagogical focus and approach include activities informed by the author's decades of experience teaching writing. These activities are described in depth, including assignment prompts, sample work, and scripts for think-aloud protocols and discussions.
