Azher Siddiqui, 2022-12-28 Those that follow international migration commonly agree on the fact that the late twentieth  
century has been the age of migration However human migration started about two million years ago and continues to the  
present The author hails from India and immigrated to the United States in the late twentieth century Researching his  
ancestors migration patterns led to the interesting but not surprising discovery that they too migrated to India from different  
parts of the world Migration impacts culture and that effect is captured in some period photographs that are part of this book  
Footprints in stone however is not just about the past It also speaks to contemporary life in the United States of America and  
then ventures to look to the future to what could be possible if we take care of the myriad challenges that humans face in the  
first quarter of the twenty first century The readers of Footprints in stone in 2089 will hopefully gain from reading about the  
past but they will be the only ones to see if the author s predictions were accurate *Best Career and Education Web Sites*
