## **We Robots Staying Human In The Age Of Big Data:**

*We, Robots* Curtis White, 2015 In the noble tradition of Jaron Lanier's *You Are Not a Gadget* Penguin 2011 Curtis White's *We Robots* takes the radical position that maybe we shouldn't cede every bit of control humanity and decision making to technology and that the techno futurists in our mix have things dangerously backwards What a notion In this sharply argued and rousing book White not only attacks the technology loving establishment but offers a beautiful and essential alternative

**Living in a World that Can't Be Fixed** Curtis White, 2019-11-05 An inspiring case for practicing civil disobedience as a way of life and a clear vision for a better world full of play caring and human connection In an era of peak global suffering and uncertainty there has never been a more opportune time to re think and re build our entire social order And it has never been more clear that our politicians and authorities will not be up to the task only we can create the world we actually want to live in And we can do it now In *Living in a World that Can't Be Fixed* Curtis White argues that the only way to save the planet bypass social antagonisms and build communities that actually work for us is through a strong and vital counterculture He shows us the legacy and effectiveness of countercultural movements that existed long before the storied 1960s and imagines the similar sweeping changes we could make today including where we live how we work what we eat and the media we consume White the most inspiringly wicked social critic of the moment Will Blythe Elle reveals how the products of our current so called resistance from Ken Burns to Black Panther rarely offer a meaningful challenge to power and how our loyalty to the American Lifestyle is self defeating and keeps us from making any real social change The world has been turned upside down but thankfully we now have a guide for righting it on our terms Transcendent Curtis White, 2023-01-17 Scholars of Buddhism will benefit from White's shrewd takes Publishers Weekly Acclaimed cultural critic Curtis White examines current fissures in Western Buddhism and argues against the growth of scientific and corporate dharma particularly in Stephen Batchelor's Secular Buddhist movement In *Transcendent* celebrated cultural critic Curtis White asks what Buddhism will look like in the future Do we want a secular Buddhism that looks like corporations and neuroscience Or do we want a Buddhism that still provides refuge from the debased world of money and things Transcendence is not about magic realms where spirits fly about the world is as Shunryu Suzuki put it its own magic We only need to reclaim it and reclaim our humanity while we're at it The problem White suggests is a culture that recognizes only things capitalist things and science things and aggressively denies the idea that the world of things has a beyond We're told by science ideologues like the New Atheists that we live in a secular age and that philosophy is dead and art is only an amusement and transcendence is not wanted because science can provide all the wonder and beauty we need *Transcendent* is a call for the re enchantment not only of Buddhism but also of our Western art traditions White recalls the risks and the raptures of the English Romantics Beat poets and the children of the counterculture all in the name of a living world and in defiance of our current world of climate catastrophe contagious disease and social collapse *Robot Journalism: Can*

*Human Journalism Survive?* Noam Lemelshtrich Latar, 2018-03-09 Artificial Intelligence AI is changing all aspects of communications and journalism as automatic processes are being introduced into all facets of classical journalism investigation content production and distribution Traditional human roles in these fields are being replaced by automatic processes and robots The first section of this book focuses on a discussion of AI the new emerging field of robot journalism and the opportunities that AI limitations create for human journalists The second section offers examples of the new journalism storytelling that empower human journalists using new technologies new applications and AI tools While this book focuses on journalism the discussion and conclusions are relevant to all content creators including professionals in the advertising industry which is a major main source of support for journalism
