The text discusses pros and cons of RESTful vs non-RESTful web services and also compares these to older but still heavily used distributed object component middleware. The text guides readers to select an appropriate middleware technology to use for any given task and to learn new middleware technologies as they appear over time without being greatly overwhelmed by any new concept. The book begins with an introduction to different distributed computing paradigms and a review of the different kinds of architectures, architectural styles, patterns, and properties that various researchers have used in the past to examine distributed applications and determine the quality of distributed applications. Then it includes appropriate background material in networking and the web security and encoding necessary to understand detailed discussion in this area. The major middleware paradigms are compared and a comparison methodology is developed. Readers will learn how to select a paradigm and technology for a particular task after reading this text. Detailed middleware technology review sections allow students or industry practitioners working to expand their knowledge to achieve practical skills based on real projects so as to become well functional in that technology in industry. Major technologies examined include RESTful web services, RESTful cloud interfaces such as OpenStack, AWS, EC2 interface, CloudStack, AJAX, JAX, RS, ASP, NET, MVC, and ASP, NET Core, non-RESTful SOAP and WSDL based web services, JAX, WS, Windows Communication Foundation, distributed objects, components, Enterprise Java Beans, NET Remoting, CORBA. The book presents two projects that can be used to illustrate the practical use of middleware and provides implementations of these projects over different technologies. This versatile and class tested textbook is suitable depending on chapters selected for undergraduate or first year graduate courses on client server architectures, middleware, and cloud computing, web services, and web programming. *Information Technology in Hospitality*, 2005 *The Wall Street Journal*, 2002 Using Information Technology Stacey C.
