*Web of Life and Cosmos* Krsanna Duran,2013-12-19 The human story written in DNA continues to push the species beginnings deeper and deeper into history with mystery ancestors Evolutions of species are inextricably entangled in a web of life that stretches through the Earth Sun and Galaxy and this is where the saga begins Victorian historians many of whom had never seen a Mayan site in the nineteenth century dismissed Mayan paintings of a series of catastrophes 12 500 years ago after fire fell from the sky The scenes were too incredible to believe when Charles Darwin s theory of evolution was the cutting edge of science and uniformitarian protocol ruled Carbon dating in 2013 of molten debris scattered across four continents found that the heavens rained fire 12 800 years ago In this period when numerous mammals disappeared an extensive study concluded in 2013 that Bigfoot s DNA mutated The Mediterranean Sea filled with water and deluged what had been dry land East of the still forming sea in Turkey the oldest ritual center yet discovered was built with rare genius 12 000 years ago Ancient alien researcher Krsanna Duran examines the chaotic genesis of civilization and Bigfoot s DNA mutation Global civilization flourished before glacial floods Symbols and language shared around the world Atlantis third destruction Mayan Hindu Greek and Sumerian viewpoints Cosmic debris across four continents Solar system changes Galactic superwave Atlantis and Mu Crop circles Ancient astronauts UFOs This book is masterfully done and the concepts and facts incredible The research is thorough and most appropriate The book and the content are riveting Each section is like an overview of a complete subject and there is so much more to be learned within each of these sections and subjects I am amazed and in awe about our actual history and I am disappointed in the garbage taught in the Institutions of Higher Learning Thankfully my higher education was in science physics and math so I can wrap my mind around most of these concepts since they make so much sense The laws and rules are basically the same The applications are just amazing Thomas Lypka A wonderful book I could barely put it down Jonathan Burke

**Books in Print Supplement** ,2002 *Bigfoot and Human Ancestors* Krsanna Duran,Ida M. Kannenberg,2013-05-21 Genetic creation and natural selection meet in nature s melting pot and social engineering in this true adventure It brings the multitude of human species to the doorstep of shared origins and self realization with the rubric of sciences and Ancestors lost in time Now is the time to know who you really are This book is masterfully done and the concepts and facts incredible The research is thorough and most appropriate The book and the content are riveting Each section is like an overview of a complete subject and there is so much more to be learned within each of these sections and subjects I am amazed and in awe about our actual history and I am disappointed in the garbage taught in the Institutions of Higher Learning Thankfully my higher education was in science physics and math so I can wrap my mind around most of these concepts since they make so much sense The laws and rules are basically the same The applications are just amazing Thomas Lypka A wonderful book I could barely put it down Jonathan Burke The frontier of species mind and soul exploded with novelty in 2013 when a five year study of Bigfoot DNA corroborated key points of Ida

Kannenberg's UFO contact notes about human origins Seventy years after a UFO encounter in 1940 Ida Kannenberg's discussions with UFO contactors engaged a spectrum bridging Bigfoot's human nature potentials and ancestors as well as time travel Elders of Arcturus and more Ancient alien researcher Krsanna Duran examines the chaotic backstory Bigfoot's DNA mutation She offers new evidence of a mother language anciently shared by peoples of Europe and Asia presents the facts behind the myths of catastrophic flooding at the end of the ice age and the facts of a catastrophic cosmic impact scattered molten debris across four continents She compares these with the catastrophes recorded in ancient Mayan codices as well as in Hindu Greek and Sumerian records Bigfoot's DNA mutations ceased by the time the world's first temple was built at Gobekli Tepe Turkey 12 000 years ago as the sunset of a golden age approached Enigmas of the modern world unravel with the truth of human genesis and confounding incident at Babel A pioneer researcher of UFO contact phenomena Ida M Kannenberg was the recipient of the Dr Leo Sprinkle Award at the 22nd Rocky Mountain UFO Conference in 2001 Ms Kannenberg was instrumental in founding with Dr Sprinkle the first UFO experimenter focused conference at the University of Wyoming in 1980 **Our Cosmic Ancestry in the Stars** Chandra Wickramasinghe, Ph.D., Kamala

Wickramasinghe, Gensuke Tokoro, 2019-05-14 An exploration of how acceptance of panspermia will soon change history Offers extensive scientific proof of panspermia that life arose on Earth via comets and that evolution is seeded by viruses arriving via comets and interstellar dust Explores the major philosophical psychological cultural religious and environmental ramifications of the acceptance of this new scientific worldview Mainstream consensus is that life arose on Earth spontaneously out of primordial soup Yet this theory as well as the Darwinian survival of the fittest concept as it relates to major steps in evolution has no scientific basis or proof Where then did life come from As the authors show with conclusive scientific evidence life came from space a concept known as panspermia We humans and all other life on Earth evolved over millennia in response to viruses that arrived via comets and we continue to do so Exploring the philosophical psychological cultural and environmental ramifications of the acceptance of panspermia the authors show how the shift will be on par with the Copernican Revolution when it was finally accepted that the Earth was not the center of the Universe Explaining the origins of the panspermia theory in the work of the late Sir Fred Hoyle the authors reveal the vast body of evidence that has accumulated over the past 4 decades in favor of the cosmic origins of life including viral inserts found in DNA that have shaped our human genome over millions of years They show how the tiniest of viruses microscopic animals tardigrades and even seeds have been found to be natural cosmonauts The authors also show how space borne viruses play a crucial role in the positive evolution of life and that our entire existence on this planet is contingent on the continuing ingress of cosmic viruses Revealing how panspermia offers answers to some of humanity's longstanding questions about the origins of life the authors discuss the impact this shift in understanding will have on our relationship with the Earth and on culture history and religion And perhaps the most dramatic ramification of all is that acceptance of panspermia means acceptance that Earth is

not unique that other life filled planets exist and intelligent life is common in the Universe Not only did we come from space but we are not alone      **Bigfoot, Golden Sunrise and Human Ancestors** Krsanna Duran, Ida M. Kannenberg, 2013-05-17
