

The background of the book cover is a black and white photograph of a modern interior space, possibly a train station or a large hall. The ceiling features a grid of skylights, and the floor is made of large, light-colored tiles. In the foreground, the silhouettes of several people are visible, some standing and some walking, creating a sense of movement and depth. The overall atmosphere is architectural and contemporary.

Web Animation using JavaScript Julian Shapiro, 2015-03-13 We've come a long way since the days of flashing banner ads and scrolling news tickers. Today the stunning motion design of iOS and Android dramatically improves a user's experience instead of detracting from it. The best sites and apps of today leverage animation to improve the feel and intuitiveness of their interfaces. Sites without animation are starting to feel antiquated. This book provides you with a technical foundation to implement animation in a way that's both visually stunning and programmatically maintainable. Throughout we consider the balance between enriching a page with motion design while avoiding unnecessary flourishes. Readers will learn how to design loading sequences that ensure users stay fully engaged instead of tuning out. How to leverage simple physics principles to make apps respond naturally to users' input just like motion behaves in the real world. How to exploit CSS transforms to create rich depth in animations and how to fully leverage JavaScript animation libraries like Velocity.js to streamline animation programming. From animation performance to theory we cover everything needed to become a professional web animator. Whether you're a novice or professional web developer, this book is for everyone. Why is all of this so important? Why is it worth your time to become a professional motion designer? For the same reason that designers spend hours perfecting their pages' font and color combinations, motion designers perfect their animations' transition and easing combinations. Refined products feel superior. They leave users whispering to themselves, "Wow, this is cool, right?" before they turn to a friend and exclaim, "You gotta try this!"
