**Text + Field** Sara L. McKinnon, Robert Asen, Karma R. Chávez, Robert Glenn Howard, 2016-06-01 Rhetorical critics have long had a troubled relationship with method viewing it as at times opening up provocative avenues of inquiry and at other times as closing off paths toward meaningful engagement with texts. Text Field shifts scholarly attention from this conflicted history looking instead to the growing number of scholars who are supplementing text based scholarship by venturing out into the field where rhetoric is produced enacted and consumed. These field based practices involve observation ethnographic interviews and performance. They are not intended to displace text based approaches rather they expand the idea of method by helping rhetorical scholars arrive at new and complementary answers to long standing disciplinary questions about text context audience judgment and ethics. The first volume in rhetoric and communication to directly address the relevance processes and implications of using field methods to augment traditional scholarship. Text Field provides a framework for adapting these new tools to traditional rhetorical inquiry. Aside from the editors the contributors are Roberta Chevrette, Kathleen M. de Ons, Danielle Endres, Joshua P. Ewalt, Alina Haliliuc, Aaron Hess, Jamie Landau, Michael Middleton, Tiara R. Na'puti, Jessy J. Ohl, Phaedra C. Pezzullo, Damien Smith, Pfister, Samantha Senda, Cook, Lisa Silvestri and Valerie Thatcher.

*National Cyber Emergencies* Greg Austin, 2020-01-23 This book documents and explains civil defence preparations for national cyber emergencies in conditions of both peace and war. The volume analyses the escalating sense of crisis around state sponsored cyber attacks that has emerged since 2015 when the United States first declared a national emergency in cyberspace. It documents a shift in thinking in the USA from cooperative resilience oriented approaches at national level to more highly regulated state led civil defence initiatives. Although the American response has been mirrored in other countries the shift is far from universal. Civil defence strategies have come into play but the global experience of that has not been consistent or even that successful. Containing contributions from well placed scholars and practitioners this volume reviews a selection of national experiences from the USA, Australia, India, China, Estonia and Finland and a number of key thematic issues information weapons, alliance coordination and attack simulations. These demonstrate a disconnect between the deepening sense of vulnerability and the availability of viable solutions at the national level. Awareness of this gap may ultimately lead to more internationally oriented cooperation but the trend for now appears to be more conflictual.

and rooted in a growing sense of insecurity This book will be of much interest to students of cyber security homeland security disaster management and international relations as well as practitioners and policy makers
