*Excessive Pricing and Competition Law Enforcement* Yannis Katsoulacos, Frédéric Jenny, 2018-09-12 This volume examines the controversy surrounding the use of competition law to combat excessive pricing While high or monopolistic pricing is not regarded as an antitrust violation in the US employing abuse of dominance provisions in competition laws to fight excessive pricing has gained popularity in some BRICS jurisdictions and a number of EU member states in recent years The book begins by discussing the economic arguments for and against the prohibition of excessive or unfair prices by firms with market power It then presents various country studies focusing on developed countries such as the UK and Israel and on the BRICS countries to highlight various practical challenges involved in recognizing excessive prices as abusive conduct on the part of dominant firms including how to define measure and identify excessive prices The contributors also discuss other policy options that can be used to fight excessive prices in order to protect consumer welfare **The Producers'**

**Time** Briton Hadden, Henry Robinson Luce,2004-03 Political Price Cycles in Regulated Industries Claudio Paiva,Rodrigo Moita,2006 This paper develops a model of political regulation in which politicians set the regulated price in order to maximize electoral support by signaling to voters a pro consumer behavior Political incentives and welfare

constraints interact in the model yielding an equilibrium in which the real price in a regulated industry may fall in periods immediately preceding an election The paper also provides empirical support for the theoretical model Using quarterly data from 32 industrial and developing countries over 1978 2004 we find strong statistical and econometric evidence pointing toward the existence of electoral price cycles in gasoline markets
