## **Range** David Epstein,2021-04-27

The 1 New York Times bestseller that has all America talking with a new afterword on expanding your range as seen on CNN s Fareed Zakaria GPS Morning Joe CBS This Morning and more The most important business and parenting book of the year Forbes Urgent and important an essential read for bosses parents coaches and anyone who cares about improving performance Daniel H Pink Shortlisted for the Financial Times McKinsey Business Book of the Year Award Plenty of experts argue that anyone who wants to develop a skill play an instrument or lead their field should start early focus intensely and rack up as many hours of deliberate practice as possible If you dabble or delay you ll never catch up to the people who got a head start But a closer look at research on the world s top performers from professional athletes to Nobel laureates shows that early specialization is the exception not the rule David Epstein examined the world s most successful athletes artists musicians

inventors forecasters and scientists He discovered that in most fields especially those that are complex and unpredictable generalists not specialists are primed to excel Generalists often find their path late and they juggle many interests rather than focusing on one They're also more creative more agile and able to make connections their more specialized peers can't see Provocative rigorous and engrossing Range makes a compelling case for actively cultivating inefficiency Failing a test is the best way to learn Frequent quitters end up with the most fulfilling careers The most impactful inventors cross domains rather than deepening their knowledge in a single area As experts silo themselves further while computers master more of the skills once reserved for highly focused humans people who think broadly and embrace diverse experiences and perspectives will increasingly thrive **Instructor and Teacher**, 1989 **Diploma in Management - City of London**
