Sustainability in the Mineral and Energy Sectors Sheila Devasahayam, Kim Dowling, Manoj K. Mahapatra, 2016-09-15

Sustainable practices within the mining and energy sectors are assuming greater significance due to uncertainty and change within the global economy and safety security and health concerns. This book examines sustainability issues facing the mining and energy sectors by addressing six major themes: Mining and Mineral Processing, Metallurgy and Recycling, Environment, Energy, Socioeconomic and Regulatory, and Sustainable Materials and Fleets. Emphasizing an integrated transdisciplinary approach, it deliberates on optimizing mining productivity and energy efficiency and discusses integrated waste management practices. It discusses risk management, cost cutting and integration of sustainable practices for long term business value. It gives a comprehensive outlook for sustainable mineral futures from academic and industry perspectives, covering mine to mill optimization, waste risk and water management, improved efficiencies in mining tools and equipment, and performance indicators for sustainable developments. It covers how innovation and research underpin management of natural resources, including sustainable carbon management. Focuses on mining and mineral processing, metallurgy and recycling, the environment, energy, socioeconomic and regulatory issues, and sustainable materials and fleets. Describes metallurgy and recycling and uses economic, environmental and social parameter analyses to identify areas for improvement in iron, steel, aluminium, lead, zinc, copper and gold production. Discusses current research on mining performance indicators for sustainable development, sustainability in mining equipment, risk and safety management, and renewable energy resources. Covers alternative and conventional energy sources for the mineral sector as well as water treatment and remediation and energy sustainability in mining. Provides an overview of sustainable carbon management. Offers an interdisciplinary approach with international focus.

Integrated Approaches to Health: Concepts and Experiences in Framing, Integration and Evaluation of One Health and EcoHealth Simon R. Rüegg, Sandra C. Buttigieg, Flavie L. Goutard, Aurélie Binot, Serge Morand, Séverine Thys, Hans Keune, 2019-10-21. Integrated approaches to health address health challenges arising from the intertwined spheres of humans, animals and ecosystems. This eBook is the product of an interdisciplinary effort to establish how One Health/EcoHealth and other integrated approaches to health are conceptualized, framed, implemented and evaluated today. It supplements the handbook for the evaluation of One Health published by the COST Action Network for Evaluation of One Health (NEOH) with in-depth reflections on the theory behind integrated approaches to health and One Health, more specifically a brief version of the NEOH evaluation framework, a supplementary evaluation approach and eight case studies in which the NEOH framework was applied. The eBook is intended for practitioners, researchers, evaluators as well as funders of integrated approaches to health and beyond. Without the outstanding support and leadership from the management committee, this work would not have been achieved. Our gratitude goes to Maria Eleni Philippitzi (BE), Vronique Renault (BE), Nihad Fejzic (BA), Sabina Seric Haracic (BA), Nenad Turk (HR), Relia Beck (HR), Luca Guardabassi (DK), Liza Rosenbaum (Nielsen DK).
