Multicultural Planning in Mid-Sized Cities Nicole M. Kurtz, University of Waterloo. School of Planning, 2014 Multiculturalism embraces racial and cultural differences within a society This is a well established aspect of Canadian life especially in Canada's largest cities because the majority of immigrants prefer to settle in major urban areas

Planning practice in these large cities has evolved to reflect and incorporate considerations of multiculturalism. However, the experience in many of Canada's mid-sized cities is considerably different. While mid-sized cities see benefits in attracting immigrants and multiculturalism, planning practice seems less progressive in this sense. This thesis explores how urban planners in Ontario's mid-sized cities could incorporate multiculturalism in order to promote more inclusive planning practice. This research reveals that planners in Ontario's mid-sized cities do not have a clear perception of multicultural planning due to several key factors which include a lack of training in the modernist principles of urban planning in a postmodern society and inter-departmental disconnects within local government administrations. Further, the study demonstrates that many planners do not consider multicultural planning to be an important issue due to the lack of cultural diversity within their city. Based on these and related findings, this thesis recommends that additional training on multicultural planning be required within all planning schools and that practicing planners should be required to take continuing studies on multicultural planning and current planning issues. Furthermore, it recommends planners learn how to promote an inclusive practice and require all federal and provincial planning legislation and leading organizations CIP, OPPI, PA and PSB work together to determine the role of planners and cultural diversity at the municipal level. Planning Departments should establish stronger protocols in order to ensure they are aware of all cultural plans and initiatives within the municipality which impact land use and social planning; this reflects the disconnect between various municipal departments and the Planning Department. Furthermore, planners should promote a more inclusive planning practice by encouraging immigrants to participate in their local government and consider cultural differences when conducting public participation and outreach.

Youth Participation in Community Planning Ramona K. Mullahey, 1999 The Western Journal of Black Studies, 2009 Urban Planning for Arid Zones Gideon Golany, 1978. Collects studies by 19 contributors in diverse fields that define the problems of urban planning in arid climates along with proposed solutions.

Comparative Urban Planning Law James A. Kushner, 2003. This text is divided into a series of discussion topics offering descriptions of the American response to specific urban problems and contrasting the American experience with approaches from other nations. Kushner offers readers, including those with no experience in the field, a wide range of discussion topics to suit their interests. The selected subjects range from traditional planning techniques such as zoning and smart growth management systems to affordable housing, transportation, economic development and urban revitalization. Other topics such as land use controls and land development laws in different countries are also included. This book can be read by those simply interested in the field or by readers searching for a lively discussion of contemporary problems.

Journal of Planning Literature, 2004 The Twentieth Century Urban Planning Experience, 1998 Planning in Cities Roger Zetter, Rodney R. White, 2002. In this collection that bridges theory and practice, experts address the conflicting challenges of the increasingly rapid scale and speed of city growth and the problem of finding effective urban planning policies and management strategies to handle such challenges.
