## **Urban Recycling And The Search For Sustainable Community Development:**

**Urban Recycling and the Search for Sustainable Community Development** Adam S. Weinberg,David N. Pellow,Allan Schnaiberg,2000-07-24 More Americans recycle than vote And most do so to improve their communities and the environment But do recycling programs advance social economic and environmental goals To answer this three sociologists with expertise in urban and environmental planning have conducted the first major study of urban recycling They compare four types of programs in the Chicago metropolitan area a community based drop off center a municipal curbside program a recycling industrial park and a linkage program Their conclusion admirably elaborated is that recycling can realize sustainable community development but that current programs achieve few benefits for the communities in which they are located The authors discover that the history of recycling mirrors many other urban reforms What began in the 1960s as a sustainable community enterprise has become a commodity based profit driven industry Large private firms using public dollars have chased out smaller nonprofit and family owned efforts Perhaps most troubling is that this process was not born of economic necessity Rather as the authors show socially oriented programs are actually more viable than profit focused systems This finding raises unsettling questions about the prospects for any sort of sustainable local development in the globalizing economy Based on a decade of research this is the first book to fully explore the range of impacts that recycling generates in our communities It presents recycling as a tantalizing case study of the promises and pitfalls of community development It also serves as a rich account of how the state and private interests linked to the global economy alter the terrain of local neighborhoods

**Garbage Wars** David Naguib Pellow,2004-09-17 A study of the struggle for environmental justice focusing on conflicts over solid waste and pollution in Chicago In Garbage Wars the sociologist David Pellow describes the politics of garbage in Chicago He shows how garbage affects residents in vulnerable communities and poses health risks to those who dispose of it He follows the trash the pollution the hazards and the people who encountered them in the period 1880 2000 What unfolds is a tug of war among social movements government and industry over how we manage our waste who benefits and who pays the costs Studies demonstrate that minority and low income communities bear a disproportionate burden of environmental hazards Pellow analyzes how and why environmental inequalities are created He also explains how class and racial politics have influenced the waste industry throughout the history of Chicago and the United States After examining the roles of social movements and workers in defining resisting and shaping garbage disposal in the United States he concludes that some environmental groups and people of color have actually contributed to environmental inequality By highlighting conflicts over waste dumping incineration landfills and recycling Pellow provides a historical view of the garbage industry throughout the life cycle of waste Although his focus is on Chicago he places the trends and conflicts in a broader context describing how communities throughout the United States have resisted the waste industry s efforts to locate hazardous facilities in their backyards The book closes with suggestions for how communities can work more effectively for
