Army Training Manual TC 3-97. 61 (FM 3-97. 61)* U.S. Department of the Army,Army Training and Doctrine Command,Army Center of Maneuver Excellence,2013-01-18 This training circular details techniques Soldiers and leaders must know to cope with mountainous terrain These techniques are the foundation upon which the mountaineer must build They must be applied to the various situations encountered to include river crossings glaciers snow covered mountains ice climbing rock climbing and urban vertical environments The degree to which this training is applied must be varied to conform to known enemy doctrine tactics and actions This TC also discusses basic and advanced techniques to include acclimatization illness and injury equipment anchors evacuation movement on glaciers and training Field Manual FM 3-97. 61 (TC 90-6-1) *Military Mountaineering* August 2002 United States Army,2012-09-02 Mountains exist in almost every country in the world and almost every war has included some type of mountain operations This pattern will not change

therefore soldiers will fight in mountainous terrain in future conflicts. Although mountain operations have not changed several advancements in equipment and transportation have increased the soldiers' capabilities. The helicopter now allows access to terrain that was once unreachable or could be reached only by slow methodical climbing. Inclement weather however may place various restrictions on the capabilities of air assets available to a commander. The unit must then possess the necessary mountaineering skills to overcome adverse terrain to reach an objective. This field manual details techniques soldiers and leaders must know to cope with mountainous terrain. These techniques are the foundation upon which the mountaineer must build. They must be applied to the various situations encountered to include river crossings, glaciers, snow covered mountains, ice climbing, rock climbing and urban vertical environments. The degree to which this training is applied must be varied to conform to known enemy doctrine, tactics and actions. This FM also discusses basic and advanced techniques to include acclimatization, illness and injury, equipment anchors, evacuation movement on glaciers and training. This field manual is a training aid for use by qualified personnel in conjunction with FM 3-97-6 Mountain Operations which is used for planning operations in mountainous terrain. Personnel using FM 3-97-61 should attend a recognized Department of Defense Mountain Warfare School for proper training. Improper use of techniques and procedures by untrained personnel may result in serious injury or death. Personnel should be certified as Level I Basic Mountaineer, Level II Assault Climber or Level III Mountain Leader before using FM 3-97-61 for training. see Appendix A *21st Century U.S. Military Manuals* U. S. Military, U. S. Army, Department of Defense, 2017-04-14. Written by the Army Mountain Warfare School AMWS this workbook provides crucial information about mountain warfare training. The untrained mountain Soldier has two foes: the enemy and the mountain. But he can make a friend and ally of the mountain by learning to know it. The mountain can give him cover and concealment points of vantage and control even at times food, water and shelter. The instructions in this manual even cover the site selection and building of a snow cave.

Century U. S. Army Mountain Operations Field Manual U. S. Department of Defense Staff,2002-04-01 This U S Army field manual FM 3 97 6 describes all aspects of operations in mountainous terrain the physical environment weather effects on personnel and equipment reconnaissance and surveillance firepower and force protection maneuver movement and mobility offensive and defensive operations the use of motti tactics developed by the Finns logistics and combat service support and mountain illnesses and injuries For historical perspective there is a description of the 1987 Satukandav Pass battle in the Soviet Afghan War along with other informative battles The introduction states The US Army has a global area of responsibility and deploys to accomplish missions in both violent and nonviolent environments The contemporary strategic environment and the scope of US commitment dictate that the US Army be prepared for a wide range of contingencies anywhere in the world from the deserts of southwest Asia and the jungles of South America and southeast Asia to the Korean Peninsula and central and northern Europe The multiplicity of possible missions makes the likelihood of US involvement in mountain operations extremely high With approximately 38 percent of the world s landmass classified as mountains the Army must be prepared to deter conflict resist coercion and defeat aggression in mountains as in other areas Throughout the course of history armies have been significantly affected by the requirement to fight in mountains During the 1982 Falkland Islands Malvinas War the first British soldier to set foot on enemy held territory on the island of South Georgia did so on a glacier A 3 000 meter 10 000 foot peak crowns the island and great glaciers descend from the mountain spine In southwest Asia the borders of Iraq Iran and Turkey come together in mountainous terrain with elevations of up to 3 000 meters 10 000 feet Mountainous terrain influenced the outcome of many battles during the Iran Iraq war of the 1980s In the mountains of Kurdistan small Kurdish formations took advantage of the terrain in an attempt to survive the Iraqi Army s attempt to eliminate them In the wake of the successful United Nations UN coalition effort against Iraq US forces provided humanitarian assistance to Kurdish people suffering from the effects of the harsh mountain climate Major mountain ranges which are found in desert regions jungles and cold climate zones present many challenges to military operations Mountain

operations may require special equipment special training and acclimatization Historically the focus of mountain operations has been to control the heights or passes Changes in weaponry equipment and technology have not significantly shifted this focus Commanders should understand a broad range of different requirements imposed by mountain terrain including two key characteristics addressed in this manual 1 the significant impact of severe environmental conditions on the capabilities of units and their equipment and 2 the extreme difficulty of ground mobility in mountainous terrain [Military Ski Manual](#)
