Information and Communication Technologies in Public Administration Christopher Reddick, Leonidas Anthopoulos, 2015-04-08 An examination of how information technology IT can be used in public administration. Information and Communication Technologies in Public Administration Innovations from Developed Countries examines global perspectives on public administration and IT innovations. This book illustrates the theoretical context of current policies issues and imp **Necessary Evil** David Kinley, 2018-02-01 Finance is the evil we cannot live without. It governs almost every aspect of our lives and has the power to liberate as well as enslave. With the world's total financial assets valued at a staggering 300 trillion being four times larger than the combined output of all the world's economies there is apparently plenty to go around. Yet while proponents of finance driven capitalism point to the trickle down effect as its contribution to wealth redistribution there are still nearly a billion people across the globe existing on less than 2 a day. 14 percent of Americans are living below the official poverty line and disparities in wealth equality everywhere have reached unprecedented levels. Evidently a trickle is not enough. How can this be when so much wealth abounds and when finance is supposedly chastened and reformed after its latest global crisis? How especially can it be in an age when human rights are more loudly proclaimed than ever before? Can the financial sector be made to shoulder more of the burden of spreading wealth reducing poverty and protecting rights? And if so what role can human rights play in making it happen? In answering these questions David Kinley draws on a vast array of material from bankers economists lawyers and politicians as well as human rights activists philosophers historians and anthropologists alongside his own experiences working in the field. **Necessary Evil** shows how finance can shed its conceit return to its role as the economy's servant not its master and regain the public trust and credibility it has so spectacularly lost over the past decade all by helping human rights not harming them.

Assessing the Balance of Power in Central-Local Relations in China John Donaldson, 2016-07-01 How do we understand the evolution of central local relations in China during the reform period? This book addresses this question by focusing on eight separate issues in which the central local relationship has been especially salient: government finance, investment control, regional development, administrative zoning, implementation culture, social welfare and international relations. Each chapter introduces a sector and the way the center and various local governments have shared or divided power over the different periods of China's reform era. The balance of power is gauged dynamically over time to measure the extent to which one level of government dominates influences or shares power in making decisions in each of these particular domains as well as what is likely to occur in the foreseeable future. The authors assess the winners and losers of these changes among key actors in China's society. The result provides a dynamic view of China's changing power relations. **Regional Impacts of EPA Carbon Regulations** United States. Congress. Senate.
