International Books in Print ,1990      **Human Fatigue** Francesco Marino,2019-03-15

Fatigue is a condition spanning the breadth of human functioning in health and disease and is a central concern in sport and exercise Even so we are yet to fully understand its causes One reason for this lack of understanding is that we seldom consider fatigue from an evolutionary perspective as an adaptation that provided reproductive success This ground breaking book outlines the evidence that fatigue is a result of adaptations distinctive to humans It argues that humans developed adaptations which led to enhanced fatigue resistance compared with other mammals and discusses the implications in the context of exercise health and performance Highly illustrated throughout it covers topics such as defining and measuring fatigue the emotional aspect of fatigue how thermoregulation affects the human capacity to resist fatigue and fatigue in disease Human Fatigue is essential reading for all exercise scientists as well as graduate and undergraduate students in the broad field of physiology and exercise physiology

**Developing Critical Languaculture Pedagogies in Higher Education** Adriana Raquel

Díaz,2013-09-17 Despite widespread agreement about the need to develop interculturally competent graduates there is a lack of agreement about how this goal may be achieved in practice This is significant as universities around the world particularly in English speaking countries have espoused an interculturally aware vision for their future graduates and turned to language education as an inherently intercultural activity to expose students to a world which is linguistically and culturally different from their own This book focuses on narrowing the gap between the often conflicting theoretical and practical imperatives faced by language teachers in an internationalised higher education context It does so by providing comprehensive conceptual discussions of emerging critical intercultural language pedagogies as well as empirical accounts and case studies from the frontline
