informative discussions on points of law where the courts and the IRS may not see eye to eye **Towards a Neutral Formulary Apportionment System in Regional Integration** Shu-Chien Chen, 2023-03-09 International tax regimes and practices are heavily criticized for failing to fairly levy corporate tax on giant multinational taxpayers in the current globalized and digitalized world. This important and far seeing book demonstrates how formulary apportionment (FA) an approach by which a multinational corporation pays each jurisdiction's corporate tax based on the share of its worldwide income allocated to that jurisdiction can achieve the much sought goal of aligning value creation and taxation. The author through an intensive analysis of the European Union's EU's Common Consolidated Corporate Tax Base (CCCTB) Directive Proposal's and comparison to the United States' US's formulary apportionment experience shows how the perceived problems with an FA system can be overcome and lays out the necessary elements for its feasibility. With detailed attention to the debates around formulary apportionment and its theoretical foundations the book provides a blueprint for rebuilding the normative framework for the EU's tax reform by clearly analysing the implications of the following and more theorising public benefits to be represented by taxation reorganising different economic theories about tax neutrality and tax justice advancing the comparative legal research methodology to analyse law reform by combining the functional approach and the problem solving approach designing the logical formulary apportionment system for digital economy ensuring the removal of the incentive for multinationals to shift reported income to low tax locations reducing the tax system's complexity and the administrative burden it imposes on firms eliminating transfer pricing complexity for intra firm transactions achieving equal weighting of the sales factor the labour factor and the asset factor in the formula application of destination based rule for attributing the sales factor and replacing the traditional permanent establishment nexus with a factor presence nexus. The presentation incorporates extensive comparison between the EU's formulary apportionment tax reform option and FA systems existing in the United States' US at state level including reference to relevant US case law and legislation. As a possible option to address the problem of base erosion and profit shifting (BEPS) formulary apportionment is gaining increasing acceptance and attention. This book will prove invaluable to taxation authorities tax practitioners and scholars in its deeply informed and systematic guidance on good practices and prevention of problematic experiences in establishing and implementing an effective and market neutral FA system.

Venture Capital Investment and Government Incentives Tamara Wilkinson, 2024-09-05

This book explores the best ways for governments to design venture capital investment incentives. Venture capital is a multi billion dollar industry and a major driver of innovation and national growth. Investment in startup companies by venture capital funds helps finance new inventions and create wealth, economic growth and jobs. However, because venture capital investment is highly risky and sensitive to market downturns, many governments around the world use special legal and tax incentives to help encourage this form of investment. Since the introduction of the first venture capital incentive in the USA in 1958, scores of venture capital incentives have come and gone. These incentives have experienced varied success, with some failing entirely. Filling a gap in an important area, this book employs a legal and regulatory approach to examine venture capital policy from a global perspective. It uses an analytical framework to evaluate the design, implementation and success of incentives and looks at over 60 examples from 25 countries around the world. The book is aimed at researchers and policy makers in law, finance and economics, as well as practitioners and investors in the venture capital space. The book introduces the legal aspects of venture capital investment and presents a list of leading practice guidelines and recommendations to help policy makers design effective, efficient and appropriate venture capital incentives.

Removing Tax Barriers to China's Belt and Road Initiative Michael Lang, Jeffrey Owens, 2018-11-27 Since its announcement in 2013 the Belt and Road Initiative BRI also known as the New Silk Road has gradually gained international recognition. The project requires not only extensive investment in infrastructure and transportation but also an acceleration of the internationalization of multinationals and supply chains in Belt and Road countries. The project will hopefully lead governments and businesses in countries along the Belt and Road to compete adopt best practices and improve transparency. The BRI marks a national push by China to increase economic links to Southeast Asia Central Asia Russia the Baltic region Central and Eastern Europe Africa and Latin America which will have major consequences for the way that tax systems interact. Emerging from the research conducted by the WU Global Tax Policy Center in cooperation with several Chinese universities this book offers fourteen policy relevant research papers prepared by international experts on the following issues: The New Silk Road Will Tax Be a Facilitator or a Barrier Neo BEPS China's Prescription for International Tax Reform Embodying the Rationality of the Belt International Taxation Coordination under China's Belt and Road Strategy Tax Issues in the Main Belt and Road Countries and Industries of China's Outward Foreign Direct Investment Preferential Arrangements under Chinese Tax Treaties with Belt and Road Countries and Disputes Regarding Their Applicability Tax Planning by Going Global Enterprises for Cross Border Earnings Observations Based on Belt and Road Countries International Taxation Issues under the Belt and Road Initiative Corporate Income Tax Laws and Tax Treaties Financial and Tax Operations in the Five Central Asian Countries The Role of Border Crossing Procedures in the Transportation of Goods along the New Silk Road Transfer Pricing Issues Related to the Belt and Road Initiative Tax Treaties
