*Sustainable Growth in a Post-Scarcity World* Mr Philip Sadler,2012-08-28 Over 20 years ago Philip Sadler then head of a leading British business school wrote Managerial Leadership in the Post Industrial Society In it he predicted that business would experience the most radical transformation since the Industrial Revolution of the 19th century This transformation has now taken place In his latest book Sustainable Growth in a Post Scarcity World Sadler charts developments once envisaged by Keynes Chase Galbraith and Packard and more recent radical thinkers such as Chris Anderson Sadler describes how many goods and services have moved from relative scarcity to relative abundance and asks how this trend can be reconciled with the global issues of population growth and climate change He assesses the impact of new technologies new energy sources new materials and the development of artificial intelligence on business government and economics and discusses the challenges ahead the creation of new business models the need to meet people s legitimate expectations of improved living conditions while avoiding environmental catastrophe and the need to adapt ideas developed in scarcity to conditions of abundance Why is it that in countries foremost in creating post scarcity conditions millions are still in poverty and billions worldwide still lack basic necessities of life Philip Sadler agrees with those who say the relief of global poverty cannot rely on aid and corporate philanthropy He explores the idea of re engineering products and delivering them into bottom of the pyramid BOP markets and concludes that the more global companies take this route as some are already doing the more profitable they will find it and this will in turn help the poorest people who currently pay more for goods and services the poverty penalty than the rich

**The Digital Doctor: Hope, Hype, and Harm at the Dawn of Medicine's Computer Age** Robert Wachter,2015-04-10 The New York Times Science Bestseller from Robert Wachter Modern Healthcare s 1 Most Influential Physician Executive in the US While modern medicine produces miracles it also delivers care that is too often unsafe unreliable unsatisfying and impossibly expensive For the past few decades technology has been

touted as the cure for all of healthcare's ills. But medicine stubbornly resisted computerization until now. Over the past five years, thanks largely to billions of dollars in federal incentives, healthcare has finally gone digital. Yet once clinicians started using computers to actually deliver care, it dawned on them that something was deeply wrong. Why were doctors no longer making eye contact with their patients? How could one of America's leading hospitals give a teenager a 39-fold overdose of a common antibiotic despite a state-of-the-art computerized prescribing system? How could a recruiting ad for physicians tout the absence of an electronic medical record as a major selling point? Logically enough, we've pinned the problems on clunky software, flawed implementations, absurd regulations, and bad karma. It was all of those things, but it was also something far more complicated. And far more interesting. Written with a rare combination of compelling stories and hard-hitting analysis by one of the nation's most thoughtful physicians, *The Digital Doctor* examines healthcare at the dawn of its computer age. It tackles the hard questions from how technology is changing care at the bedside to whether government intervention has been useful or destructive. And it does so with clarity, insight, humor, and compassion. Ultimately, it is a hopeful story. We need to recognize that computers in healthcare don't simply replace my doctor's scrawl with Helvetica 12, writes the author, Dr. Robert Wachter. Instead, they transform the work the people who do it and their relationships with each other and with patients. Sure, we should have thought of this sooner. But it's not too late to get it right. This riveting book offers the prescription for getting it right, making it essential reading for everyone patient and provider alike who cares about our healthcare system.
