Design and Management of Sustainable Built Environments Runming Yao, 2013-03-12 Climate change is believed to be a great challenge to built environment professionals in design and management. An integrated approach in delivering a sustainable built environment is desired by the built environment professional institutions. The aim of this book is to provide an advanced understanding of the key subjects required for the design and management of modern built environments to meet carbon emission reduction targets. In *Design and Management of Sustainable Built Environments*, an international group of experts provide comprehensive and the most up to date knowledge covering sustainable urban and building design, management and assessment. The best practice case studies of the implementation of sustainable technology and management from the BRE Innovation Park are included. *Design and Management of Sustainable Built Environments* will be of interest to urban and building designers, environmental engineers and building performance assessors. It will be particularly useful as a reference book for undergraduate and postgraduate students in the built environment field. *Urban Drainage* David Butler, John Davies, 2017-07-12 *Urban Drainage* has been thoroughly revised and updated to reflect changes in the practice and priorities of urban drainage. New and expanded coverage includes Sewer flooding, The impact of climate change, Flooding models, The move towards sustainability. Providing a descriptive overview of the issues involved as well as the engineering principles and analysis, it draws on real world examples as well as models to support and demonstrate the key issues facing engineers dealing with drainage issues. It also deals with both the design of new drainage systems and the analysis and upgrading of existing infrastructure. This is a unique and essential textbook for students of water, environmental and public health engineering as well as a valuable resource for practising engineers. **The Environmental Design Pocketbook** Sofie Pelsmakers, 2019-10-23 The *Environmental Design Pocketbook* 2nd ed places the information you need for sustainable low energy building design at your fingertips. Packed with diagrams, tools and tips, it cuts through the complex mass of technical data and legislation that faces the designer and distils all the key guidance into a single reference that is quick, easy to use and points to the facts, figures and performance data that are most important. This 2nd edition is now fully up to date with the latest Building Regulations Part L and F legislation, England and Wales RIBA Plan of Work 2013, new information on the Green Deal and Zero Carbon and contains revised references and further reading sections throughout. Whether used in the classroom, office or on site, the book guides the designer through the entire process from the fundamentals to the building details. From future proofing for a changing climate to rainwater harvesting, retrofit and zero carbon technologies, the *Pocketbook* has got it covered. **Green City Development Tool Kit** Asian Development Bank, 2015-09-01 The term Green City has many different meanings to different people. There is no universal solution that can be applied to every city. Adaptable, responsive and innovative solutions that differ from one place to another enable Green Cities to emerge in various forms and enable us to recognize the variation and dynamism of cities. *Green Development*

considers how to improve and manage the overall quality and health of water air and land in urban spaces its correlation with hinterlands and wider systems and the resultant benefits derived by both the environment and residents This tool kit is a reference for Asian Development Bank staff consultants and city leaders that introduces key concepts of Green City development and identifies crosscutting issues that help in designing urban programs to support city development in a green and sustainable manner It outlines a three step city assessment framework and provides a summary of existing tools and resources for green and sustainable development
