*Applications of Novel Analytical Methods in Epidemiology* Moh A. Alkhamis, Victoria J. Brookes, Kimberly VanderWaa, 2018-12-07 The repertoire of quantitative analytical techniques in disciplines such as ecology decision science and evolutionary biology has grown in part enabled by the development and increased availability of computational resources Integration of cutting edge quantitative tools into veterinary epidemiology that have been borrowed from such disciplines has offered opportunities to advance the study of disease dynamics in animal populations to improve and guide decision making related to disease prevention control or eradication Furthermore the need to explore new analytical methods for veterinary epidemiology has been driven by the increasing availability and complexity of animal disease data The objective of this e book is to contribute to current methods in epidemiology by 1 presenting and discussing novel analytical tools that help advance our understanding of epidemiology and 2 demonstrating how inferences emerging from the application of novel analytical tools can be incorporated into decision making related to animal health The e book constitutes a collection of articles that explore the applications of a variety of analytical methods such as machine learning Bayesian risk assessment and an advanced form of social network analysis in the modern epidemiologic study of animal diseases [Resources in Education](#)
