**Phases 1-2** J. Rafael Angel, 2017-07-17 A concept-driven and assessment-focused approach to Spanish teaching and learning. Approaches each chapter with statements of inquiry framed by key and related concepts set in a global context. Supports every aspect of assessment using tasks designed by an experienced MYP educator. Differentiates and extends learning with research projects and interdisciplinary opportunities. Applies global contexts in meaningful ways to offer an MYP Spanish programme with an internationally minded perspective.      **Writers of the Spanish Colonial Period** David William Foster, Daniel Altamiranda, 1997 These critical studies propose innovative readings and overall reformulations of the texts and authors that stand as representative of the period for the contemporary reader. The first group of articles refers to reports, chronicles, and Renaissance epics, a vast block of texts that fall in most cases halfway between history and narrative fiction and examine the experiences of the discovery, the conquest, and the colonization of the new territories. The second group concentrates on regionally marked texts from the Baroque period, especially those of the central figure of the Mexican nun poet and intellectual, Sor Juana Inés de la Cruz. Finally, there are some essays on representative texts of the latter part of the colonial period. Committee on Resources of American Libraries. National Union Catalog Subcommittee, 1970     **Arts of Perception** Jeremy Robbins, 2013-05-13 Arts of Perception offers a new account of a key period in Spanish history and culture and a fundamental reassessment of its major writers and intellectuals including Gracián Quevedo, Calderón de la Barca, Saavedra Fajardo, Lope de Vega, and Sor Juana. Reading these figures in the context of European thought and the new science and philosophy the study considers how they developed various arts of perception complex perceptual strategies designed to overcome and exploit epistemic problems to enable an individual to act effectively in the moral, political, social, or religious sphere. The study takes as its subject the distinctive epistemological mentality behind such arts of perception. This mentality was fostered by the creative interaction of scepticism and Stoicism and found expression in the key concepts *ser parecer* and *engaño* and *desengaño*. The work traces the emergence, development, and impact of these concepts on Spanish thought and culture. As well as offering new interpretations of specific major figures, *Arts of Perception* offers an interpretation of the mentality of an entire culture as it made the fraught transition to intellectual modernity. As such, it ranges over numerous discourses and formative contexts and provides a wealth of new material which will be of use to all those seeking to understand and interpret the literature, culture, and thought of Golden Age Spain. This book was previously published as a special issue of *The Bulletin of Spanish Studies*
