The key components of digital restorative dentistry—image acquisition, prosthetic restorative design and fabrication—are fully addressed. Readers will find helpful information on scanners, the software for prosthetic design and the materials and technologies for prosthesis fabrication, including laser sintering, 3D printing, CAD/CAM and laser ablation. The section on clinical procedures explains all aspects of the use of digital technologies in the treatment of patients requiring removable partial dentures, complete dentures, fixed partial prostheses, crowns, endodontics and implant surgery and prosthodontics. The field of restorative and prosthetic dentistry is undergoing rapid transition as these new technologies come to play an increasingly central role in everyday dental practice.
