doubled and agricultural production per person has increased by a third Yet this growth in production has masked enormous  
hidden costs arising from widespread pesticide use massive ecological damage and high incidences of farmer poisoning and  
chronic health effects Whereas once the risks involved with pesticide use were judged to be outweighed by the potential  
benefits increasingly the external costs of pesticides to environments and human health are being seen as unacceptable In  
response to this trend recent years have seen millions of farmers in communities around the world reduce their use of  
harmful pesticides and develop cheaper and safer alternatives The Pesticide Detox explores the potential for the phasing out  
of hazardous pesticides and the phasing in of cost effective alternatives already available on the market This book makes  
clear that it is time to start the pesticide detox and to move towards a more sustainable agriculture      **Pulp & Paper**
