Eerie Science Experiments Terri Kaye Duncan, 2019-12-15 What will some scientists do in the name of science? Some are willing to go to extremes, even if it means experimenting on their own bodies. They will drink vomit, undergo surgical procedures while awake, or even face a ferocious charging bull if doing so will further their research. This book introduces readers to six scientists, each of whom took science experiments to extremes. Their eerie experiments may have been weird, a little crazy, or just plain gross, but all left a lasting impression. They prove that science is not for the faint of heart and inspire young minds to think outside of the box.
