fields to gain comprehensive knowledge and succeed in your chosen industry , *Fundamentals of Innovative Sustainable Homes Design and Construction* Avi Friedman,2023-06-26 This book offers ideas and practices on contemporary design concepts and illustrates them with plans and photographs of outstanding examples Current planning and design modes of dwellings and neighborhoods are facing challenges of philosophy and form Past approaches no longer sustain new demands and require innovative thinking The need for a new outlook is propelled by fundamental changes that touch upon environmental economic and social aspects The depletion of non renewable natural resources and climate change are a few of the environmental challenges Increasing costs of material labor land and infrastructure have posed economic challenges with affordability being paramount among them Social challenges are also drawing the attention of designers builders and homeowners Walkable communities aging in place and multigenerational living are some of the concepts considered In addition live work environments have become part of the economic reality for those who wish to work from home which has become possible through digital advances The text would be of interest to scholars working in architecture urban planning and construction

The Smart City - how smart can 'IT' be? Malin Granath,2016-08-30 Cities are facing many challenges challenges linked to world wide trends like urbanisation climate changes and globalisation In parallel to these trends we have seen a rapid digitalisation in and of different parts of society Cities and local governments have been appointed an important role in overcoming these world wide challenges and subsequently in policy practices digitalisation is perceived as an important dimension in delivering better and sustainable services to its citizens As a result the smart city has emerged as a concept and approach to contemporary urban planning and development There is still no common understanding of the concept and what components and dimensions it covers However in all definitions digitalisation constitutes one dimension but the role and function of it is still not clear In this study I have examined how different stakeholders talk about digitalisation in policy and planning practices of urban development The aim has been to identify and analyse different repertoires of discourses on digitalisation to advance our knowledge on how goals related to the smart city and digitalisation are put into practice The results are based on a qualitative and interpretative case study with a social constructionist approach An analytical framework based on discourse analysis stakeholder theory and new institutional theory has been constructed to analyse the case Main results show that repertoires on digitalisation are limited in both policy and planning of urban development In these practices digitalisation is primarily seen as a means or as a communication infrastructure in relation to two city services functions i.e. services related to governance and to environment Results also show that practices of urban planning and development are institutionalised where different stakeholders salience and stakes in urban development and in digitalisation differ but it is clear that digitalisation is a secondary issue Implications of these results are that the taken for granted discourses in policy and planning practices of urban development limit both practice and research when developing a smart city

St der st r inf r m nga utmaningar kopplat till v rldsomsp nande trender s som urbanisering

klimatförändringar och globalisering Parallellt med dessa trender har vi sett en snabb digitalisering i och av olika delar av samhället I detta sammanhang har städer och kommuner blivit tilldelade en viktig roll i hanteringen av dessa utmaningar På policynivå ses digitalisering som en viktig dimension för att leverera hållbar och bättre service till medborgarna Som ett led i detta har smarta städer vuxit fram som både begrepp och metod för stadsplanering och stadsutveckling Det finns dock ingen gemensam tolkning av begreppet Däremot finns digitalisering med som en dimension i definitionerna men vilken roll och funktion den har är fortfarande oklart I denna studie har jag undersökt hur olika intressenter talar om digitalisering i olika policy och planeringspraktiker kopplat till stadsutveckling Syftet har varit att identifiera och analysera repertoarer av digitaliseringsdiskurser för att bidra med kunskap om hur man kopplade till smarta städer och digitalisering omsätts i praktiken Resultaten är baserade på en kvalitativ och tolkande fallstudie med en socialkonstruktionistisk ansats Ett analytiskt ramverk baserat på diskursanalys intressentanalys och nyinstitutionell teori har tagits fram för att analysera fallet Resultaten visar att digitaliseringsrepertoarer är begränsade både i policy och i planering av stadsutveckling I dessa praktiker ses digitalisering främst som ett verktyg eller en kommunikationsinfrastruktur i relation till två samhällsfunktioner nämligen funktioner kopplade till styrning och administration och funktioner kopplade till miljö Resultaten visar också att praktiker kopplade till stadsplanering och stadsutveckling är institutionaliserade praktiker där olika intressenter har olika maktlegitimitet och angelägenhet gällande stadsutveckling och digitalisering Det är dock tydligt att digitalisering är en sekundär fråga Implikationerna av dessa resultat är att de förgravetagna diskurserna begränsar både praktiken och forskningen i utvecklingen av smarta städer

Human-Smart City Interactions and User-Citizen Experiences George A. Tsihrintzis, Maria Virvou, Vangelis

Marinakis, Lakhmi C. Jain, 2026-01-01 This book focuses on human smart city interaction exploring how people engage with smart technologies and how human factors influence the citizen experience Smart cities aim to enhance urban life by infusing digital technologies data analytics and artificial intelligence into city functions Through widespread use of ICT they streamline operations cut costs and improve citizen experiences by analyzing real time data from sensors infrastructure and residents Yet their full potential remains largely underused It is intended for academics researchers practitioners and students in fields like engineering artificial intelligence policy and governance while remaining accessible to readers from other disciplines as well Authored by leading researchers each chapter includes extensive references for deeper exploration of specific smart city applications
