The Vocation Lectures Hackett Classics:

The Vocation Lectures Max Weber, 2004-03-15 Originally published separately Weber's Science as a Vocation and Politics as a Vocation stand as the classic formulations of his positions on two related subjects that go to the heart of his thought the nature and status of science and its claims to authority and the nature and status of political claims and the ultimate justification for such claims Together in this volume these newly translated lectures offer an ideal point of entry into Weber's central project understanding how as Weber put it in the West alone there have appeared cultural manifestations that seem to go in the direction of universal significance and validity The Interest in Disinterestedness Pierre Bourdieu, 2024-07-04 A key feature of those who work for the state in the legal system and in public services is that they claim to be putting their own personal interests aside and working in a disinterested fashion for the public good But is disinterested behaviour possible Can law be treated as a set of universal rules that are independent of particular interests or is this mere ideology Is the state bureaucracy a universal class as Hegel thought or a structure that serves the interests of the dominant class as Marx claimed In his lecture courses at the Collège de France in 1987-88 and 1988-89 Pierre Bourdieu addressed these questions by examining the formation of the legal and bureaucratic fields characteristic of the modern state uncovering the historical and social conditions that enable a social group to form and find its own interests in the very fact of serving interests that go beyond it For a disinterested universe to emerge it needs both the invention of a public service or a spirit of service to the public cause and the creation of a social universe in which individuals can pursue a career devoted to public service and be rewarded for it In other words it requires a process of specialization whereby autonomous specific fields become established in the social cosmos within which a special kind of game that follows the rules of disinterest can be played out By reconstructing the conditions under which an interest in disinterestedness emerged Bourdieu sheds new light on the formation of the modern state and legal system and provides a fresh perspective on the many professions in modern societies that are oriented towards the service of the common good *Political Entrepreneurship* Josef Lentsch, 2018-11-20 This book demonstrates how political entrepreneurs entrepreneurially minded citizens who launch innovative political start-ups can drive political change Building on unique insights rich examples and personal stories of centrist political entrepreneurs distilled from 40 in-depth interviews the author guides readers through key stages of political entrepreneurship and shows how to master them By equally highlighting successes and failures the book reveals how political entrepreneurs actually go about producing transformative political change In light of the populist challenge and the decline of traditional political parties the book also offers an entertaining backstage view and first-hand insights into the successes of En Marche in France Ciudadanos in Spain NEOS in Austria and other centrist political startups It provides practical advice on how to learn from and replicate their successes Political practitioners and other politically interested readers will find a useful theory of Political Entrepreneurship what it is how it works and what its role is in 21st century

democracies Most of all they will find essential reproducible tools and methods You have read a lot about startups in business but if you want to know how Silicon Valley style startups look in politics read this Its author is not only writing about political entrepreneurs he is one of them Ivan Krastev Chairman of the Centre for Liberal Strategies in Sofia and permanent Fellow at the Institute of Human Sciences in Vienna No one understands better what it takes to take a political start up from ideation to the parliament than Josef Lentsch In Political Entrepreneurship he combines first hand experience with a thoughtful review of what we know about entrepreneurship in the interest of society Johanna Mair Professor of Organization Strategy and Leadership at the Hertie School of Governance and Co Director Global Innovation for Impact Lab at Stanford University Josef Lentsch has produced a fascinating commanding guide to the new insurgent players shaking up traditional party systems and reinvigorating liberal politics Political Entrepreneurship is essential reading for anyone who wants to understand today s fragmented and disrupted European politics and the European politics of the future Jeremy Cliffe Charlemagne columnist The Economist The rarest of events has occurred a new political species has appeared in the European eco system the centrist political start up From Macron s En Marche in France to Spain s Ciudadanos a new type of political actor has emerged Few are better positioned to tell this Europe wide story than Josef Lentsch who has had a front seat view on this important political transformation that is shaking Europe A dramatic and important account Daniel Ziblatt Eaton Professor of Government Harvard University and co author of How Democracies Die Climate Change and the Future of Democracy R. S. Deese,2018-09-10 This book will survey past and present efforts to democratize international institutions and will advance the argument that a new degree of transparency and accountability on a global scale is necessary to address the threat of climate change The volume will analyse how global governance could become more democratic and consequently more responsive to the challenge of climate change As economic globalization has accelerated since 1945 international institutions have done a remarkable job in facilitating global communication and commerce but have been far less effective in protecting the global commons **Unexpected Prosperity** Oscar Calvo-Gonzalez,2021 Unexpected Prosperity explains how Spain managed to avoid the middle income trap With an original interpretation of the economic rise of Spain Calvo Gonzalez addresses questions about the political economy of reform the role of industrial and public policy and the enduring legacy of political violence and conflict **The Rise of a New Educational Field, 1895-1926** Xing Ying,2026-02-04 This book examines China s educational transformation between 1895 and 1926 Based on three case studies it explores the rise of a new field of education and reveals the intricate relationship between educational reforms intellectual societies and revolutionary movements Through meticulous historical analysis the book chronicles the evolution of China s modern education system during a period of profound social and political change Part I examines how new style schools replaced the traditional imperial examination system in Hunan Province from 1895 to 1913 thereby transforming the educational landscape Part II focuses on the influential reforms instituted at Peking University which

established a balance between academic political and moral orthodoxies to reshape China's intellectual sphere Part III explores the crucial connection between secondary schools and the early communist revolutionary movement demonstrating how educational institutions became incubators for revolutionary ideas and activities By examining these interconnected developments the book illuminates how educational reform became intertwined with broader currents of social transformation and revolutionary change in early 20th century China This work will appeal to historians of modern China as well as to scholars and students of Chinese studies interested in the intersection of educational history historical sociology and modern Chinese history and revolutionary movements

The Palgrave Handbook of Political Economy Ivano Cardinale, Roberto Scazzieri, 2018-08-16 This book is a major contribution to the study of political economy With chapters ranging from the origins of political economy to its most exciting research fields this handbook provides a reassessment of political economy as it stands today whilst boldly gesturing to where it might head in the future This handbook transcends the received dichotomy between political economy as an application of rational choice theory or as the study of the causes of societies material welfare outlining a broader field of study that encompasses those traditions This book will be essential reading for academics researchers students and anyone looking for a comprehensive reassessment of political economy

Research Handbook on the Sociology of Knowledge Fran Collyer, 2025-07-15 This timely Handbook celebrates and contributes to the recent revitalisation of the sociology of knowledge A diverse group of leading experts from the global North and South provide a state of the art overview of a field which is developing rapidly with the growth of poststructuralist postcolonial and feminist approaches

Morphology, Neurogeometry, Semiotics Alessandro Sarti, 2024-06-03 Jean Petitot is a polyhedric thinker whose contributions have been fundamental in a number of disciplines such as epistemology morphodynamics differential geometry structural semiotics neurogeometry phenomenology linguistics cognitive grammars the theory of catastrophes social sciences literary studies and aesthetics This book is a homage to his huge contribution about the main concepts of morphogenesis and meaning that constitute the center of gravity around which Petitotian reflection revolves and returns The scientific path of Jean Petitot develops between these two poles topology and meaning At stake it was to challenge the hiatus separating the exact sciences from the humanities that was the main point of the Petitot seminar of EHESS Epistemology of Models By designing the appropriate qualitative dynamics between the two poles form and meaning it is possible to understand the Saussurian sign in structural semiotics or the Greimasian semiotic square for deep narrative structures or even the canonical formula of the myth of Lévi Strauss in structural anthropology These are just few results in applying the theory of catastrophes to the emergence of meaning The book is a collection of testimonies by distinguished authors who worked extensively with Jean Petitot in the different fields of Mathematics Neurogeometry Semiotics Aesthetics and Epistemology An extensive bibliography of Petitot's work is also presented
