Rabin, 1992-07     **Injuries and Remedies** Marc A. Franklin, 1979     **Injuries and Remedies. Cases and Materials on Tort Law and Alternatives. 2. Ed** Marc A. Franklin, 1979     **Philosophy and the Law of Torts** Gerald J. Postema, 2001-11-19     When accidents occur and people suffer injuries, who ought to bear the loss? Tort law offers a complex set of rules to answer this question, but up to now philosophers have offered little by way of analysis of these rules. In eight essays commissioned for this volume, leading legal theorists examine the philosophical foundations of tort law. Amongst the questions they address are the following: how are the notions at the core of tort practice such as responsibility, fault, negligence, due care and duty to repair to be understood? Is an explanation based on a conception of justice feasible? How are concerns of distributive and corrective justice related? What amounts to an adequate explanation of tort law? This collection will be of interest to professionals and advanced students working in philosophy of law, social theory, political theory and law, as well as anyone seeking a better understanding of tort law     **Tort Law in Focus** Geoffrey Rapp, 2020-02-02     Tort doctrine is complex and nuanced; on its own a torts casebook that mystifies first year students will not help them develop the core skill of legal analysis. *Tort Law in Focus* presents concepts in a way that students can understand and apply. Rather than hide the ball, Geoffrey Rapp explains new terms clearly and guides students in the specific techniques of applying tort law to practice based problems. Along with concrete examples, *Tort Law in Focus* provides clear and thorough introductions to those areas of tort law such as proximate cause under the dominant and new Restatement approaches, res ipsa factual cause, including but for cause and alternatives in special cases like indivisible injuries and alternative causes, the

duty of owners and occupiers of land and comparative negligence that are especially challenging for first year law students Professors and Students Will Benefit From Clear introductions and transitional text that frame key rules concepts and cases A wide selection of modern high interest cases that apply dominant legal rules and which where possible interpret and apply the Restatement Third Summaries and discussion of canonical cases that convey the history and context of modern tort law Examples flow charts and maps that illustrate concepts rules and the relationships among parties and interests Consistent use of problems that encourage students to implement IRAC or equivalent strategies for structuring their analysis Samples of documents commonly used in tort law practice such as demand letters and complaints *Tort Law* Thomas C. Galligan,2007

*Comparing Tort and Crime* Matthew Dyson,2015-07-02 The fields of tort and crime have much in common in practice particularly in how they both try to respond to wrongs and regulate future behaviour Despite this commonality in fact fascinating difficulties have hitherto not been resolved about how legal systems co ordinate or leave wild the border between tort and crime What is the purpose of tort law and criminal law and how do you tell the difference between them Do criminal lawyers and civil lawyers reason and argue in the same way Are the rules on capacity consent fault causation secondary liability or defences the same in tort as in crime How do the rules of procedure operate for each area Are there points of overlap When how and why do tort and crime interact This volume systematically answers these and other questions for eight legal systems England France Germany Sweden Spain Scotland the Netherlands and Australia *Tort Law* Catherine Elliott,2009

*Tort Law* John C. P. Goldberg,Leslie Kendrick,Anthony James Sebok,Benjamin C. Zipursky,2021 This is a book on tort law for law students *Competition Policy and Patent Law under Uncertainty* Geoffrey A. Manne,Joshua D.

Wright,2011-06-13 The regulation of innovation and the optimal design of legal institutions in an environment of uncertainty are two of the most important policy challenges of the twenty first century Innovation is critical to economic growth Regulatory design decisions and in particular competition policy and intellectual property regimes can have profound consequences for economic growth However remarkably little is known about the relationship between innovation competition and regulatory policy Any legal regime must attempt to assess the trade offs associated with rules that will affect incentives to innovate allocative efficiency competition and freedom of economic actors to commercialize the fruits of their innovative labors The essays in this book approach this critical set of problems from an economic perspective relying on the tools of microeconomics quantitative analysis and comparative institutional analysis to explore and begin to provide answers to the myriad challenges facing policymakers *Compensation, Personal Accountability and Social Responsibility, Concise-CasebookPlus* Dan B.
