Reifenberg Parameterizations for Sets with Holes Guy David, Tatiana Toro, 2012 The authors extend the proof of Reifenberg's Topological Disk Theorem to allow the case of sets with holes and give sufficient conditions on a set E for the existence of a bi-Lipschitz parameterization of E by a d dimensional plane or smooth manifold Such a condition is expressed in terms of square summability for the P Jones numbers $\beta_1^p(x, r)$ In particular it applies in the locally Ahlfors regular case to provide very big pieces of bi-Lipschitz images of \mathbb{R}^d

The Social Construction of Race and Ethnicity in the United States Prince Brown, 2001 This groundbreaking collection of classic and cutting edge sociological research gives special attention to the social construction of race and ethnicity in the United States It offers an in depth and eye opening analysis of a the power of racial classification to shape our understanding of race and race relations b the way in which the system came into being and remains and c the real consequences this system has on life chances The readings deal with five major themes the personal experience of classification schemes classifying people by race ethnic classification the persistence functions and consequences of social classification and a new paradigm transcending categories For individuals who want to gain a fuller understanding of the impact the ideas of race has on a society that is consumed by it
