

PRODUCTION PART APPROVAL PROCESS (PPAP) Approval of New or Revised Parts

The Production Part Approval Process (PPAP) demonstrates that the manufacturing process used to produce parts for VOLVO is fully developed, thoroughly tested, and capable of serial production of parts conforming to the technical specifications.

For the PPAP (as for the APQP) VOLVO follows the AIAG requirements, using the requirements applicable for trucks and heavy equipment.

Sample parts and the supporting documentation are submitted to show evidence that:

- The design records and specifications have been properly understood and met.
- The manufacturing process has the capability to produce conforming parts in the actual production environment.
- The manufacturing process has the capacity to support production quantities at a consistent quality level.
