The Business Side of Learning Design and Technologies Shahron Williams van Rooij, 2025-06-04

The Business Side of Learning Design and Technologies provides actionable tools and techniques for recognizing the impact of learning design technology decisions at the project, business unit, and organizational levels. With a focus on aligning learning initiatives with organizational objectives, the book equips early and mid-career learning designers with essential skills in applying business strategy, artificial intelligence, data analytics, and change management to the selection, design, implementation, and evaluation of learning opportunities. This thoroughly revised second edition further emphasizes the designer as change agent, addresses the rise of remote and hybrid workplaces, adds fresh perspectives on automated and generative systems, and updates its resources, references, and interviews. Grounded in scholarly and practitioner research, systematic literature reviews, interviews with learning and development thought leaders, and real-world experience, this book provides actionable strategies for career advancement in a dynamic labor market.

Impact of AI Technologies on Teaching, Learning, and Research in Higher Education Verma, Shivani, Tomar, Pradeep, 2020-08-21

Within higher education, there are enormous untapped opportunities for product, services, companies, administrators, educators, start-ups, and technology professionals to begin embracing artificial intelligence (AI) across the student ecosystem and infuse innovation into traditional academic processes by leveraging disruptive technologies. This type of human-machine interface presents the immediate potential to change the way we learn, memorize, access, and create information. These solutions present new openings for education for all while fostering lifelong learning in a strengthened model that can preserve the integrity of core values and the purpose of higher education.

Impact of AI Technologies on Teaching, Learning, and Research in Higher Education explores the phenomena of the emergence of the use of AI in teaching and learning in higher education, including examining the positive and negative aspects of AI. Recent technological advancements and the increasing speed of adopting new technologies in higher education are discussed in order to predict the future nature of higher education in a world where AI is part of the fabric of universities. The book also investigates educational implications of emerging technologies on the way students learn and how institutions teach and evolve. Finally, challenges for the adoption of these technologies for teaching, learning, student support, and administration are addressed. Highlighting such tools as machine learning, natural language processing, and self-learning systems, this scholarly book is of interest to university administrators, educational software developers, instructional designers, policymakers, government officials, academicians, researchers, and students, as well as international agencies, organizations, and professionals interested.
